Joint external evaluation of the International Health Regulations (2005) core capacities for Estonia World Health Organization, 2024-05-09 Since its independence was restored in 1991 Estonia has restructured its public health and health security landscape and joined the European Union EU in 2004 Since this and despite its relatively small geographical

size and population the country's economic growth and the importance of Estonia and Estonians in the development of the information and communication technology ICT sector has been much remarked upon This has brought about interest in the development and uptake of ICT solutions within the health sector and considerable upgrades to health provision and infrastructure Due to Estonia's geographical position health security will always be of significant interest to the country and much has been achieved in the last 20 years With this combination of factors the WHO Joint External Evaluation JEE in Estonia was deemed of interest not only to Estonia but also as an example of how a small now highly developed country can work to improve its health security A further point of interest is that Estonia has in general a widely spaced population with low density another challenge to providing services which needs to be overcome During the JEE mission to Estonia capacities in 19 technical areas were evaluated through a peer to peer collaborative process that brought subject matter experts together with members of the external assessment team The team was composed of representatives from 10 Member States international organizations or academic institutions engaged in a week long series of technical discussions and on site visits The primary objective of the assessment was to compile a comprehensive array of evidence encapsulating evaluations reviews and other relevant insights The aim was to equip Estonian authorities with actionable information for improving implementation of the International Health Regulations IHR 2005 encompassing cost estimates high level commitment and accountability While the assessment itself can facilitate knowledge exchange and networking it does not improve health security capacities per se Therefore identified priority recommendations should be captured in a National Action Plan for Health Security NAPHS which in turn drives translation of priorities into concrete technical activities The external team acknowledges that many recommendations deal with establishing committees action plans and strategies all of which may be crucial steps for capacity development but nevertheless need to be streamlined given constraints on human resource capacity

Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions Management Association, Information Resources, 2020-09-10 Though decades ago school shootings were rare events today they are becoming normalized Active shooter drills have become more commonplace as pressure is placed on schools and law enforcement to prevent the next attack Yet others argue the traumatizing effects of such exercises on the students Additionally violence between students continues to remain problematic as bullying pervades

children's lives both at school and at home leading to negative mental health impacts and in extreme cases suicide. Establishing safer school policies promoting violence prevention programs building healthier classroom environments and providing better staff training are all vital for protecting students physically and mentally. The Research Anthology on School Shootings: Peer Victimization and Solutions for Building Safer Educational Institutions examines the current sources of violence within educational systems and it offers solutions on how to provide a safer space for both students and educators alike. Broken into four sections the book examines the causes and impacts that peer victimization has on students and how this can lead to further violence and investigates strategies for detecting the warning signs. The book provides solutions that range from policies and programs that can be established to strategies for teaching nonviolence and promoting coexistence in the classroom. Highlighting a range of topics such as violence prevention school climate and bullying this publication is an ideal reference source for school administrators law enforcement teachers government and state officials school boards academicians researchers and upper level students who are intent on stopping the persisting and unfortunate problem that is school violence.
