A red circular graphic with a gradient, appearing as a semi-circle or a partial circle, located to the right of the author's name.

Solidworks Student Edition:

Engineering Graphics and Design: As per latest AICTE curriculum, 8/e T Jeyapoovan, Engineering Graphics and Design 8e has been specifically designed and written to meet the requirements of the first semester engineering students of all colleges universities The study of Engineering Graphics and Design builds foundations of analytical graphical and design capabilities for engineering students This book adopts step by step instructions to explain drafting and solid modeling in design With all design and drafting prepared by using AutoCAD software the book would be a perfect choice for all engineering students

Cloud Computing for Engineering Applications Benito A. Stradi-Granados, 2020-04-04 This book explains the use of cloud computing systems for engineering applications to satisfy the need for enterprise level state of the art computational capacities at an affordable cost As huge costs are involved in the maintenance and timely renovation of computational capabilities particularly for projects that require significant computational capacity cloud services can achieve considerable savings for users and organizations engaged in engineering research and development Dr Stradi Granados explains how to extract a maximum value from every dollar invested in cloud computer server The types of facilities located around the world that lease their resources to customers interested in reducing the internal overhead and implementation time The volume features chapters on model generation motion studies and prototyping is ideal for students researchers practitioners and facility s managers across a range of engineering domains

Product Design and the Role of Representation Fujin Pei, James Andrew Self, 2022-03-16 This book responds to the expression all you always wanted to know about design representation but didn t know where to ask Indeed the book is a thematic guide to design representation and the amount of information about design representations it holds is phenomenal Professor Gabriela Goldschmidt Technion Israel Institute of Technology This book extends understanding of the design process by exploring design representation types and examining them as theoretical constructs It shows how fidelity and ambiguity inform the creative act of design and considers design thinking through the lens of design representation Design thinking is a method that has the potential to stimulate and enhance creativity This book enhances understanding of what constitutes design thinking why it is used and how it can be applied in practice to explore and develop ideas The book positions a particular type of thinking through design representations exploring this from its roots in design history to the types of thinking in action associated with contemporary design practice A taxonomy of design representations as a scaffold to express design intent is applied to real world case studies Product Design and the Role of Representation will be of interest to those working in or studying product development engineering design and additive manufacturing

Robotic Sailing 2016 José C. Alves, Nuno A. Cruz, 2016-09-02 This book contains selected papers that address a variety of topics related to the design development and operation of unmanned and fully autonomous sailing boats These papers were presented in the 9th International Robotic Sailing Conference in association with the 9th World Robotic Sailing Championship that took place in Viana do Castelo Portugal from

the 5th to 10th of September 2016 The book is divided in three parts each focusing on key aspects of robotic sailing The first part addresses the design construction and validation of autonomous sailboat platforms including their rigs appendages and control mechanisms The second part is devoted to the development of sensors and algorithms to enhance the performance of robotic sailing boats in terms of their speed course control and manoeuvring ability Finally the papers in the last part are dedicated to the improvement of behaviours required for the accomplishment of complex autonomous missions Robotic sailing is a relatively new multidisciplinary area of research with a recognized great potential for persistent ocean observation Using the wind for boat propulsion is something mankind has been doing for centuries Automating and optimizing the sailing process in the harsh marine environment is an ever present challenge which is now promising to bear fruit
