developed the chapter on analysis is recurrently referred to Furthermore special attention is paid to subjects that are standard in classical control theory but are frequently overlooked in modern treatments such as nonzero set point control systems tracking systems and control systems that have to cope with constant disturbances Also heavy emphasis is placed upon the stochastic nature of control problems because the stochastic aspects are so essential Preface *Government Reports Annual Index* ,1979 Sections 1 2 Keyword Index Section 3 Personal author index Section 4 Corporate author index Section 5 Contract grant number index NTIS order report number index 1 E Section 6 NTIS order report number index F Z
