Hillier,1980 Advanced Solutions of Transport Systems for Growing Mobility Grzegorz Sierpiński,2017-07-11 What are the parameters that should be taken into account in an advanced simulation model designed for a transport system that promotes green travelling policies How can the goal of modal shift be pursued through ICT solutions Is it enough to apply only a single criterion when planning transport systems What is the importance of information acquisition and provision in Intelligent Transport Systems Answers to these and many other questions can be found in this publication It also contains numerous analyses based on relevant data sets illustrating the close relationship between ITS and the changes observed in terms of how specific means of transport are used What proves to be particularly important for advanced transport systems is the use of environmentally friendly solutions that reduce their negative environmental impacts accordingly the book also addresses this aspect With regard to the research results discussed and the selected solutions applied the book primarily addresses the needs of three target groups Scientists and researchers ITS field Local authorities responsible for transport systems at the urban and regional level Representatives of business traffic strategy management and industry manufacturers of ITS components Advanced Solutions of Transport Systems for Growing Mobility gathers selected papers presented at the 14th Transport Systems Theory and Practice Scientific and Technical Conference organized by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology The conference was held on 18-20 September 2017 in Katowice Poland More details at www.TSTP.polsl.pl **Synergizing Data Envelopment Analysis and Machine Learning for Performance Optimization in Healthcare** Ajibesin, Adeyemi Abel,G., Naveen Sundar,Thangavel, Senthil Kumar,2025-05-02 Healthcare systems face the challenge of delivering high quality care while efficiently managing costs and resources Traditional methods of performance evaluation often fall short when addressing the complex and diverse nature of healthcare operations Data envelopment analysis DEA has been used to measure the efficiency of healthcare providers but its linear deterministic nature limits its adaptability to dynamic environments In contrast machine learning ML can handle complex non linear relationships and high dimensional data offering deeper insights and predictive capabilities The synergy

between DEA and ML presents an opportunity to overcome these limitations and drive more effective performance optimization. It leads to efficiency assessments through predictive analytics and improved resource allocation with data driven insights and optimizing clinical pathways and decision support systems for better patient outcomes. Synergizing Data Envelopment Analysis and Machine Learning for Performance Optimization in Healthcare explores the integration of DEA and ML to enhance performance optimization in healthcare improving efficiency care quality and resource management. It examines theoretical foundations methodological innovations and practical applications providing a comprehensive resource with a key focus on development of algorithms to address challenges in healthcare optimization. Covering topics such as healthcare equipment manufacturing human augmentation and robotic surgery this book is an excellent resource for hospital administrators clinical managers clinical decision makers policymakers public health officials professionals researchers scholars academics and more.
