The Handbook of Lithium-Ion Battery Pack Design John T. Warner, 2015-05-23 *The Handbook of Lithium Ion Battery Pack Design Chemistry Components Types and Terminology* offers to the reader a clear and concise explanation of how Li ion batteries are designed from the perspective of a manager sales person product manager or entry level engineer who is not already an expert in Li ion battery design It will offer a layman s explanation of the history of vehicle electrification what the various terminology means and how to do some simple calculations that can be used in determining basic battery sizing capacity voltage and energy By the end of this book the reader has a solid understanding of all of the terminology around Li ion batteries and is able to do some simple battery calculations The book is immensely useful to beginning and experienced engineer alike who are moving into the battery field Li ion batteries are one of the most unique

systems in automobiles today in that they combine multiple engineering disciplines yet most engineering programs focus on only a single engineering field This book provides you with a reference to the history terminology and design criteria needed to understand the Li ion battery and to successfully lay out a new battery concept Whether you are an electrical engineer a mechanical engineer or a chemist this book helps you better appreciate the inter relationships between the various battery engineering fields that are required to understand the battery as an Energy Storage System Offers an easy explanation of battery terminology and enables better understanding of batteries their components and the market place Demonstrates simple battery scaling calculations in an easy to understand description of the formulas Describes clearly the various components of a Li ion battery and their importance Explains the differences between various Li ion cell types and chemistries and enables the determination which chemistry and cell type is appropriate for which application Outlines the differences between battery types e g power vs energy battery Presents graphically different vehicle configurations BEV PHEV HEV Includes brief history of vehicle electrification and its future

Semantic Technology Guilin Qi,Kouji Kozaki,Jeff Z. Pan,Siwei Yu,2016-03-19 This book constitutes the thoroughly refereed proceedings of the 5th Joint International Semantic Technology Conference JIST 2015 held in Yichang China in November 2015 The theme of the JIST 2015 conference was Big Data and Social Media The JIST 2015 conference consisted of main technical tracks including 2 keynotes 2 invited talks a regular technical paper track full and short papers an in use track a poster and demo session workshop and tutorial The 14 full and 8 short papers in this volume were carefully reviewed and selected from 43 submissions The paper cover the following topics ontology and reasoning linked data learning and discovery RDF and query knowledge graph knowledge integration query and recommendation and applications of semantic technologies **2014**

Plug-in Vehicles, Plugged in Policy? Great Britain: Parliament: House of Commons: Transport Committee,2012-09-20 Consumer demand for plug in vehicles remains very low and the Government grant to encourage demand may not be proving effective The Government must do more to show that its plug in vehicle strategy is a good use of public money Carbon emissions from transport must be reduced if the UK is to meet its climate change targets but public money must be targeted on effective policies So far Department for Transport expenditure on plug in cars some 11 million has benefited just a handful of motorists There is a risk that the Government is basically subsidising second cars for affluent households It is also unclear whether the provision of public charging infrastructure encourages demand for plug in cars Indeed the Government does not even have a register of all the chargepoints installed at public expense

Intelligent Computing in Smart Grid and Electrical Vehicles Kang Li,Yusheng Xue,Shumei Cui,Niu Qun,2014-10-01 This book constitutes the third part of the refereed proceedings of the International Conference on Life System Modeling and Simulation LSMS 2014 and of the International Conference on Intelligent Computing for Sustainable Energy and Environment ICSEE 2014 held in Shanghai

China in September 2014 The 159 revised full papers presented in the three volumes of CCIS 461 463 were carefully reviewed and selected from 572 submissions The papers of this volume are organized in topical sections on computational intelligence in utilization of clean and renewable energy resources including fuel cell hydrogen solar and wind power marine and biomass intelligent modeling control and supervision for energy saving and pollution reduction intelligent methods in developing electric vehicles engines and equipment intelligent computing and control in distributed power generation systems intelligent modeling simulation and control of power electronics and power networks intelligent road management and electricity marketing strategies intelligent water treatment and waste management technologies integration of electric vehicles with smart grid
