The Archaeology of Tribal Societies William A. Parkinson,2002-03-01 Anthropological archaeologists have long
attempted to develop models that will let them better understand the evolution of human social organization In our search to
understand how chiefdoms and states evolve and how those societies differ from egalitarian bands we have neglected to
develop models that will aid the understanding of the wide range of variability that exists between them This volume
attempts to fill this gap by exploring social organization in tribal or autonomous village societies from several different
