The Chinese People's Liberation Army and Information Warfare Larry Wortzel, 2015-06-08. The PLA spent more than a decade examining U.S. military publications on network-centric warfare and the evolution of American doctrine on information warfare. After observing American information operations in the Balkans and the first Gulf War, the PLA saw the effect of modern information operations on the battlefield and in the international arena. The PLA then began to implement its own form of information warfare. The Chinese military has adopted information warfare concepts suited to its own organization and doctrine, blending its own traditional tactics concepts from the Soviet military and U.S. doctrine to bring the PLA into the information age. At the same time, the PLA has modernized and improved upon its own psychological warfare operations and expanded the role for its legal scholars in justifying military action and territorial claims. The PLA's command control, communications, computers, intelligence, surveillance, and reconnaissance programs support the ground forces, navy, air force, missile forces, nuclear doctrine, and space warfare. China's military doctrine depends on incorporating information technology and networked information operations. The PLA's operational concepts for employing traditional signals intelligence and electronic warfare have expanded to include cyber warfare, kinetic and cyber attacks on satellites, and information confrontation operations across the electromagnetic spectrum. In doing so, as Dr. Wortzel's monograph explains, the PLA used innovative means to expand on Cold War Soviet doctrine on radioelectronic combat, which called for a combination of jamming and precision air, missile, and artillery strikes on North Atlantic Treaty Organization forces. The Chinese military, however, apparently intends to conduct these activities at the tactical, operational, and strategic levels of war, envisioning attacks on an enemy's homeland, critical infrastructure, and points of embarkation. Along with these more technical aspects of information operations, the PLA's combination of psychological warfare, the manipulation of public opinion or media warfare, and the manipulation of legal arguments to strengthen China's diplomatic and security position, or what China calls legal warfare, join together in a comprehensive information operations doctrine. This monograph explains how the PLA is revising its operational doctrine to meet what it sees as the new mode of integrated joint operations for the 21st century. An understanding of the PLA's new concepts is important for U.S. and allied military leaders and planners.

Aytaç Kadioğlu,Kemal İnât,Laçın İdil Öztığ,Mirsad Karić,Muhidin Mulalić,Mustafa Altıntaş,Mustafa Fatih Yavuz,Saira Nawaz Abbasi,Sarmad Ali Khan,Talha Köse,Tunç Demirtaş,Valeria Giannotta,Yusuf Çınar,2023-07-01 T rkiye successfully conducted both presidential and parliamentary elections on May 14 the second elections since the change of the governmental system so completing yet another election process without encountering significant issues The People s Alliance led by AK Party has secured the majority in the legislative body the Grand National Assembly of T rkiye Although President Recep Tayyip Erdo an came first in the first round of the presidential elections he could not pass the 50 percent threshold President Erdo an received 52 percent of the votes after the runoff elections on May 28 Thus both President Erdo an and AK Party which has won all general elections since 2002 are continuing in the task of ruling the country for the next five years Both Turkish and foreign observers and officials have attached great importance to these elections Some even claimed that this year the Turkish elections are the most important globally due to the implications for international politics However it is crucial to emphasize that a significant number of Western media outlets and experts influenced by their inclination to envision a T rkiye without Erdo an were unable to accurately forecast and analyze the election outcomes In certain instances they even launched direct attacks on Turkish democracy and President Erdo an Nevertheless the election results which genuinely reflect the national will served as a profound lesson for all highlighting the importance of recognizing and respecting the democratic choices made by the Turkish people Yet the discussions surrounding the election results and their potential impact on T rkiye its foreign policy and the broader international political landscape are well founded There are several expectations from President Erdo an and his government for the next five years First of all President Erdo an and the AK Party government will consolidate and institutionalize the new governmental system that was introduced after the 2016 July 15 coup attempt one of the main turning points in the recent history of the country Although there are high expectations that the Erdo an government will make some revisions within the new political system there is no chance to return to a parliamentary system which was the main promise of the opposition during the election campaign Second the current Turkish foreign policy orientation will be consolidated and institutionalized In recent years T rkiye has been following a relatively independent and Ankara centered foreign policy orientation T rkiye has abandoned its Western oriented foreign policy orientation and diversified its foreign relations In an interview with the press during his first foreign visit since his re election on May 28 2023 President Erdo an has clearly underlined T rkiye s diversified foreign policy understanding He has pointed out that T rkiye which pursues the policy of balance based on national interests is close to both the West and the East Third with the separation of internal and external security after the change of the governmental system the two inward looking security institutions namely the Turkish Armed Forces TSK and the National Intelligence Organization M T have experienced a large scale transformation Thus TSK and M T have become real foreign policy actors and begun playing a more effective role in foreign policy issues

especially in the protection of the country's national security against external threats and in the struggle against anti-Turkish terrorist organizations deployed in different countries. Since then, Türkiye has been taking more initiatives in foreign policy issues as a result of high-level harmony between these security institutions and the Ministry of Foreign Affairs. Furthermore, under the leadership of President Erdoğan, this large-scale harmony among foreign policy actors has enabled Türkiye to mobilize hard and soft power at the same time, which is an indication of Türkiye's high-level capacity and its strategic autonomy. Fourth, with the increase of the number of foreign policy actors after the introduction and transformation of some state institutions, Türkiye has increased its effectiveness in international politics. Governmental institutions such as the Turkish Cooperation and Coordination Agency (T.C. KA), the Presidency of Turks Abroad and Related Communities (YTB), Yunus Emre Institute (YEE), and Turkish Maarif Foundation have begun to play effective roles in the foreign policy field. Diversification in foreign policy actors is an indication of Türkiye's autonomous foreign policy orientation. Türkiye has been deploying different foreign policy actors in different issue areas. President Erdoğan has declared that Türkiye will prioritize security policy for the next five years. By mobilizing hard, smart, and soft powers of the country and also by activating different foreign policy actors, Türkiye will follow an integrated foreign policy understanding. The main responsibility of the new government will be the protection of Türkiye's national interests and the provision of peace and stability in its regions. Türkiye, which opposes the return of a polarized world politics, is determined to use diplomatic means and take initiatives in the resolution of international crises. President Erdoğan and his new government will continue to attach great importance to its relations with the Western countries and to the NATO alliance. However, Türkiye expects the alliance to take more effective counterterrorism measures and the Western countries not to safeguard anti-Turkish terrorist organizations. Türkiye will continue to have a bilateral relationship with the West based on equal partnership. The new government will push for visa liberalization and updating the customs union in its relations with the European Union. On the one hand, Türkiye is determined to improve and enhance its relations with other Turkish states, especially with Azerbaijan. Following the signing of a military alliance after the Second Karabakh War, its bilateral relations with Azerbaijan are unique. Türkiye will continue to strive for the further integration of the Turkish world. On the other hand, Türkiye will continue its efforts to bring peace and stability to its regions. The Erdoğan government is determined to continue the normalization process with other regional countries in the Middle East, the Caucasus, and the Eastern Mediterranean. To sum up, Türkiye is determined to consolidate its strategic autonomy, to play a leadership and stabilizer role in its regions, and to improve its relations with all countries in the world. The main priorities of Türkiye are the protection and maximization of its national interests, the promotion of the normalization processes, and the formation of a Turkish axis in the near future. Türkiye expects to achieve these objectives with its strong infrastructure, manufacturing industry, self-reliance in the defense industry, and strategic investments in the energy sector, among others. Thus, it will be possible to make an effective start for the vision which has been called Century of

Toward an Understanding of People's Liberation Army Information Warfare Doctrine Carson Tavenner, Air Force Institute of Technology (U.S.), 2000-06-01

Chinese and American Information Warfare (IW) terminology and concepts overlap due to the Chinese incorporation of established American airpower doctrinal concepts into their own publications. Leaders and theorists within the People's Liberation Army must reexamine this incorporation of American IW thinking into the development of their own IW doctrine because the incorporation is incomplete and will cause fundamental problems for the PLA in implementing information warfare operations. This is true for two primary reasons. First, Chinese military doctrine lacks an awareness of the important role of targeting frameworks in long range precision attack missions. Targeting frameworks are essential for providing the necessary constructs for corporate as opposed to individual decision making on target selections. Second, the Chinese doctrine functions under a fundamental principle of information control which runs contrary to the tenets of speed and flexibility. Yet the recognition and utilization of these two tenets is central and fundamental in American airpower doctrine which the PLA has seemingly begun to adopt into the development of their own information warfare doctrine. The problematic subjects of targeting and information control are each vital enough to render Chinese IW doctrine ineffective. Together they will prevent success on the battlefield.

Cyber Dragon Dean Cheng, 2016-11-14

This book provides a framework for assessing China's extensive cyber espionage efforts and multi-decade modernization of its military, not only identifying the what but also addressing the why behind China's focus on establishing information dominance as a key component of its military efforts. China combines financial firepower, currently the world's second largest economy, with a clear intent of fielding a modern military capable of competing not only in the physical environments of land, sea, air, and outer space but especially in the electromagnetic and cyber domains. This book makes extensive use of Chinese language sources to provide policy relevant insight into how the Chinese view the evolving relationship between information and future warfare, as well as issues such as computer network warfare and electronic warfare. Written by an expert on Chinese military and security developments, this work taps materials the Chinese military uses to educate its own officers to explain the bigger picture thinking that motivates Chinese cyber warfare. Readers will be able to place the key role of Chinese cyber operations in the overall context of how the Chinese military thinks future wars will be fought and grasp how Chinese computer network operations, including various hacking incidents, are part of a larger, different approach to warfare. The book's explanations of how the Chinese view information's growing role in warfare will benefit U.S. policymakers while students in cyber security and Chinese studies will better understand how cyber and information threats work and the seriousness of the threat posed by China specifically.
