Dichronauts Greg Egan, 2017-07-11 Seth is a surveyor along with his friend Theo a leech like creature running through his skull who tells Seth what lies to his left and right Theo in turn relies on Seth for mobility and for ordinary vision looking forwards and backwards Like everyone else in their world they are symbionts depending on each other to survive In the universe containing Seth's world light cannot travel in all directions there is a dark cone to the north and south Seth can only face to the east or the west if he tips his head backwards If he starts to turn to the north or south his body stretches out across the landscape and to rotate as far as north north east is every bit as impossible as accelerating to the speed of light Every living thing in Seth's world is in a state of perpetual migration as they follow the sun's shifting orbit and the narrow habitable zone it creates Cities are being constantly disassembled at one edge and rebuilt at the other with surveyors mapping safe routes ahead But when Seth and Theo join an expedition to the edge of the habitable zone they discover a terrifying threat a fissure in the surface of the world so deep and wide that no one can perceive its limits As the habitable zone continues to move the migration will soon be blocked by this unbridgeable void and the expedition has only one option to save its city from annihilation descend into the unknown

Greg Egan Karen Burnham, 2014-04-30 Greg Egan 1961 publishes works that challenge readers with rigorous deeply informed scientific speculation He unapologetically delves into mathematics physics and other disciplines in his prose putting him in the vanguard of the hard science fiction renaissance of the 1990s A working physicist and engineer Karen Burnham is uniquely positioned to provide an in depth study of Egan's science heavy oeuvre Her survey of the author's career covers novels like *Permutation City* and *Schild's Ladder* and the Hugo Award winning novella *Oceanic* analyzing how Egan used cutting edge scientific theory to explore ethical questions and the nature of humanity As Burnham shows Egan's collected works constitute a bold artistic statement that narratives of science are equal to those of poetry and drama and that science holds a place in the human condition as exalted as religion or art The volume includes a rare interview with the famously press shy Egan covering his works themes intellectual interests and thought processes [Historical Dictionary of Science](#)
