The Creation Effect:

The Creation of Scientific Effects Jed Z. Buchwald, 2011-01-15 This book is an attempt to reconstitute the tacit knowledge the shared unwritten assumptions values and understandings that shapes the work of science Jed Z Buchwald uses as his focus the social and intellectual world of nineteenth century German physics Drawing on the lab notes published papers and unpublished manuscripts of Heinrich Hertz Buchwald recreates Hertz s 1887 invention of a device that produced electromagnetic waves in wires The invention itself was serendipitous and the device was quickly transformed but Hertz s early experiments led to major innovations in electrodynamics Buchwald explores the difficulty Hertz had in reconciling the theories of other physicists including Hermann von Helmholtz and James Clerk Maxwell and he considers the complex and often problematic connections between theory and experiment In this first detailed scientific biography of Hertz and his scientific community Buchwald demonstrates that tacit knowledge can be recovered so that we can begin to identify the unspoken rules that govern scientific practice *The Nature, Origin, and Effect of the Creation by Jesus Christ, Considered, in a Discourse, Delivered ... Before a Society of Unitarian Christians ... July 24, 1808* Russell SCOTT (Unitarian.), 1808

Advances in the Casimir Effect Michael Bordag, Galina Leonidovna Klimchitskaya, Umar Mohideen, Vladimir Mikhaylovich Mostepanenko, 2009-05-28 The subject of this book is the Casimir effect a manifestation of zero point oscillations of the quantum vacuum resulting in forces acting between closely spaced bodies For the benefit of the reader the book assembles field theoretical foundations of this phenomenon applications of the general theory to real materials and a comprehensive description of all recently performed measurements of the Casimir force with a comparison between experiment and theory There is an urgent need for a book of this type given the increase of interest in forces originating from the quantum vacuum Numerous new results have been obtained in the last few years which are not reflected in previous books on the subject but which are very promising for fundamental science and nanotechnology The book is a unique source of information presenting a critical assessment of all the main results and approaches from hundreds of journal papers It also outlines new ideas which have not yet been universally accepted but which are finding increasing support from experiment

The Creation of Psychopharmacology David Healy, 2009-07 David Healy follows his widely praised study *The Antidepressant Era* with an even more ambitious and dramatic story the discovery and development of antipsychotic medication Healy argues that the discovery of chlorpromazine more generally known as Thorazine is as significant in the history of medicine as the discovery of penicillin reminding readers of the worldwide prevalence of insanity within living memory But Healy tells not of the triumph of science but of a stream of fruitful accidents of technological discovery leading neuroscientific research of fierce professional competition and the backlash of the antipsychiatry movement of the 1960s A chemical treatment was developed for one purpose and as long as some theoretical rationale could be found doctors administered it to the insane patients in their care to see if it would help Sometimes it did dramatically Why these treatments

worked Healy argues provocatively was and often still is a mystery Nonetheless such discoveries made and unmade academic reputations and inspired intense politicking for the Nobel Prize Once pharmaceutical companies recognized the commercial potential of antipsychotic medications financial as well as clinical pressures drove the development of ever more aggressively marketed medications With verve and immense learning Healy tells a story with surprising implications in a book that will become the leading scholarly work on its compelling subject **The Creation of a Conscious Machine** Jean

Tardy,2023-12-15 Describes seven novel variations of the Turing test Outlines an original definition of consciousness described as implementable specifications Introduces the concept of Mathematics as a genetically transmissible cognitive medium This book presents a groundbreaking journey into the world of Generative AI technology and offers an in depth look at the prospect of AI achieving consciousness The book navigates through various historical and modern perspectives on AI from ancient myths to the Turing Test to the latest in technological advancements It covers the theoretical and practical aspects of creating a conscious AI including the specifications for synthetic consciousness and the integration of AI with human cognition The book questions whether generative AI can meet the traditional criteria of consciousness and how this might be realized **Wisconsin Session Laws** Wisconsin,1980 **When Co-Creation Leads to Love** Melanie

Oßwald,2025-07-30 Innovating organizations struggle to select suitable co creators and their ideas Co creating market relevance is challenging as one s own contributions often lead to evaluation biases such as the IKEA Effect When Labor Leads to Love the foundation of this book Transcending organizational boundaries requires transcending individual evaluation Intersubjectivity is essential for this step This work suggests using intersubjectivity as a concept for more efficient open innovation beyond individual biases The exploratory sequential research design aims to develop a comprehensive understanding of evaluation biases and the concept of intersubjectivity in open innovation It begins with qualitative inquiry including a narrative literature review and expert interviews followed by the identification and empirical testing of novel intersubjectivity related variables through laboratory and field experiments In addition to its theoretical implications this book presents a typology of contexts requiring intersubjectivity and provides a working model to guide organizations and intermediaries in their co creation practices **The Creator and the Creation, how Related** John Young,1870

Creation ex nihilo Gary A. Anderson,Markus Bockmuehl,2017-11-15 The phrase creation ex nihilo refers to the primarily Christian notion of God s creation of everything from nothing Creation ex nihilo Origins Development Contemporary Challenges presents the findings of a joint research project at Oxford University and the University of Notre Dame in 2014 2015 The doctrine of creation ex nihilo has met with criticism and revisionary theories in recent years from the worlds of science theology and philosophy This volume concentrates on several key areas the relationship of the doctrine to its purported biblical sources how the doctrine emerged in the first several centuries of the Common Era why the doctrine came under heavy criticism in the modern era how some theologians have responded to the objections and the relationship of

the doctrine to claims of modern science for example the fundamental law of physics that matter cannot be created from nothing Although the Bible never expressly states that God made everything from nothing various texts are taken to imply that the universe came into existence by divine command and was not assembled from preexisting matter or energy The contributors to this volume approach this topic from a range of perspectives from exposition to defense of the doctrine itself This is a unique and fascinating work whose aim is to present the reader with a compelling set of arguments for why the doctrine should remain central to the grammar of contemporary Christian theology As such the book will appeal to theologians as well as those interested in the relationship between theology and science Contributors Gary A Anderson Markus Bockmuehl Janet Soskice Richard J Clifford S J Sean M McDonough Gregory E Sterling Khaled Anatolios John C Cavadini Joseph Wawrykow Tzvi Novick Daniel Davies Cyril O Regan Ruth Jackson David Bentley Hart Adam D Hincks S J Andrew Pinsent and Andrew Davison

International Economics O. S. Shrivastava, **Co - Creation in Tourist Experiences** Nina K Prebensen, Joseph S Chen, Muzaffer S Uysal, 2017-04-21 The tourist experience is multi faceted and dynamic as tourists engage with its formation and creation The tourists then become vital in creating value for themselves together with the service provider Experience value cannot be pre produced but is co created between host and guest s in the servicescape The tourist managers can therefore only plan for and facilitate for value co creation to take place This book responds to the need for a critical review of how firms can facilitate and dramatize for enhanced experience value for tourists As the roles of participants and providers are changing rapidly new knowledge in terms of how value creation and value co creation can transpire needs to be generated The aim of this book is therefore to accentuate the role and importance of the core elements in value creation processes namely the customer s the setting in which co creation would take place and the provider Bringing together scholars from diverse areas to address the nature of how the actors co create values through interaction in different experience settings the book also serves as a guide to the best practice of co creation of tourist experiences It will therefore appeal practically as well as theoretically to scholars and students of tourism marketing leisure hospitality and services management

A Survey of the Wisdom of God in the Creation John Wesley, 1823 The Metaphysics of Creation Norman Kretzmann, 1999-06-17 About Aquinas St Thomas Aquinas lived from 1224 5 to 1274 mostly in his native Italy but for a time in France He was the greatest of the medieval philosopher theologians and one of the most important of all Western thinkers His most famous books are the two summaries of his teachings the Summa contra gentiles and the Summa theologiae About this book Norman Kretzmann expounds and criticizes Aquinas s natural theology of creation which is natural or philosophical in virtue of Aquinas s having developed it without depending on the data of Scripture The Metaphysics of Creation is a continuation of the project Kretzmann began in The Metaphysics of Theism moving the focus from the first to the second book of Aquinas s Summa contra gentiles Here we find Aquinas building upon his account of the existence and nature of God arguing that the existence of things other than God must be explained by

divine creation out of nothing He develops arguments to identify God s motivation for creating to defend the possibility of a beginningless created universe and to explain the origin of species He then focuses exclusively on creatures with intellects with the result that more than half of his natural theology of creation constitutes a philosophy of mind Kretzmann gives a masterful guide through all these arguments As before he not only expounds Aquinas s natural theology but advocates it as the best historical instance available to us **Lex Draconis** Ray Machuga,2020-03-04 In a world where fantasy is reality you ARE the dragon *Research Report* ,1992 **Infrastructure and Employment Creation in the Middle East and North Africa** Antonio Estache,Elena Ianchovichina,Robert Bacon,Ilhem Salamon,2013-02-20 Infrastructure has a substantial role to play in creating new jobs in the Middle East and North Africa but its potential varies greatly across countries and sectors and will not suffice to resolve the mounting unemployment problem in the region Creation of Universe God or Big Bang Keerthi Kumar Patangay,2017-10-26 The book is about dealing with atheist book of Samkya Sutra and its interpretation of creation In the chapter 2 on Astronomy author has included references from Rig Veda on Solar system and gravity Surya Sidhanta on sidereal movement of earth and also on gravity Author quotes creation of Universe from Rig Veda X 129 by Pujya RL Kashyap Taitereya samhita Stephen Stunned s understanding of Nadya sukta from Rig Veda X 129 Author also includes creation of Universe as per Brihadarnaya and Aiteriya Upanishads Various other Upanishads dealing with Creation of Universe Manvantara theory of solar evolution Speed of light as per Rig Veda and Hindu unit of time Biblical Doctrine of Creation by Rev Dr G Wright Doyle and a chapter from quran on creation is also included Then scientific evidence such as Big Bang Quantum physics professing that Universe always existed then Universe from nothing are included In the last chapter Conclusion author rebuts Samkya Sutra with various references from Bhagwad Gita Upanishads Brahma Sutra and Bible The author also rebutts Big Bang theory Author tries to draw parallel between quantum mechanics and spirituality
