Dickson, 2023-05-23 Since 1949 the Chinese Communist Party CCP has maintained an unrivaled grip over the country Despite economic calamity widespread social upheaval and even violence against its own people the party has overseen the fastest economic growth in history and only strengthened its hold on power How has it achieved this and how exactly does the party and the government function What is political life like for the people of China and how has this changed over the decades of the party's rule Is democracy on the horizon These are some of the questions that animate Bruce Dickson's exploration of Chinese politics today At the core of the party's practices is a dual approach repression when faced with existential political threats and responsiveness when faced with more localized economic or social unrest Yet while the regime is responsive to a degree often unacknowledged by international observers ultimately it is not accountable to the public The opportunity for the public to choose leaders is limited to very local levels and it is the party itself that chooses when to compromise and when to repress Dickson uses this lens to illuminate a number of key questions How are leaders chosen and how are policies made When is protest and civic engagement allowed and when is it suppressed Acknowledging that the inner workings of the party remain shrouded in secrecy Dickson draws from the full landscape of sources available to lay out what we know and what the future may hold as Xi's rule extends and takes an increasingly repressive approach to governing *Confucianism in Contemporary Chinese Politics* Shanruo Ning Zhang, 2016-03-29 This book examines the ways in which Confucian political culture operates in contemporary Chinese politics and influences its development The author argues that the authoritarian political culture performs functions similar to the democratic political culture drawing on a wide range of data surveys interviews archives Public Hearing Meeting records and the Party Congress

Political Trust in China Lianjiang Li, 2025-07-22 The authoritarian regime in China is a prime target of the US led war on autocracy however the regime claims a majority of the Chinese people trust the government with national surveys since the 1990s supporting this assertion How much do Chinese citizens actually trust the one party regime Instead of dismissing survey results Li examines the contexts in which Chinese citizens are predisposed to say they trust the government He argues that political trust in China is a power accommodating and nonbinding hope rather than a rights based and binding expectation as Chinese citizens do not have the right to grant and retract trust through free and fair elections

Populist Authoritarianism Wenfang Tang, 2016 Populist Authoritarianism focuses on the Chinese Communist Party which governs the world's largest population in a single party authoritarian state Wenfang Tang attempts to explain the seemingly contradictory trends of the increasing number of protests on the one hand and the results of public opinion surveys that consistently show strong government support on the other hand The book points to the continuity from the CCP's revolutionary experiences to its current

governing style even though China has changed in many ways on the surface in the post Mao era The book proposes a theoretical framework of Populist Authoritarianism with six key elements including the Mass Line ideology accumulation of social capital public political activism and contentious politics a government that is responsive to hype weak political and civil institutions and a high level of regime trust These traits of Populist Authoritarianism are supported by empirical evidence drawn from multiple public opinion surveys conducted from 1987 to 2014 Although the CCP currently enjoys strong public support such a system is inherently vulnerable due to its institutional deficiency Public opinion can swing violently due to policy failure and the up and down of a leader or an elite faction The drastic change of public opinion cannot be filtered through political institutions such as elections and the rule of law creating system wide political earthquakes **A New Era**

Poston, 2001-07-30 The Chinese triangle of mainland China Hong Kong and Taiwan constitutes one of the most dynamic regions in the world economy Since the late 1970s these three societies have experienced increasing economic integration however studies aimed at analyzing and explaining this integration have often overlooked the very important role social institutions have played in the shaping of this process To fill this gap this book adopts a systematic institutional approach designed to examine the different patterns of institutions in the three countries and to discuss how such social institutions as the economy gender social networks and the Chinese diaspora have exerted a profound impact on all three societies The chapters taken together argue that different patterns of institutional configuration have led to divergent paths of development and that this divergence will have significant implications on the prospects for Chinese national reunification in the twenty first century The Introductory chapter provides a historical discussion on the origins and the transformation of the Chinese triangle during the second half of the twentieth century The remainder of the volume is broken into four topics considered crucial for understanding the transformation of the Chinese triangle economic transformation gender social networks and the Chinese diaspora As globalization impacts the Chinese triangle studies that consider the issues from the perspective of social institutions will be increasingly important to understanding the area as it develops in the world economy
