Christie, 2021-04-21 The engagement of religious diplomacy within the United Nations systems has become increasingly
important for achieving the Sustainable Development Goals The editors argue that effective religious diplomacy must reflect
the great diversity of religious and spiritual expressions within human communities The editors argue that this can best be
achieved through a worldview shift within the United Nations systems Religious engagement in the United Nations systems
has been understandably constrained by limited and formal organizational structures and conventions However the existing
patterns of engagement mitigate against the very goals they seek to achieve The editors argue that expanded yet measured
religious inclusion will strengthen social cohesion in the global community Contributors demonstrate how communities
become stronger when marginalized minority voices are included in public discourse The editors further argue that
governance has a responsibility to ensure a safe environment for this interaction The editors propose that the United Nations
adopt the posture of loyal opposition that is inherent in parliamentary democracies to serve as a guideline for expanded
religious engagement The contributors advance this proposal with illustrations from multiple contexts that address a diverse
