As one of the leading figures in this field, Christiane Nord gives the first full survey of functionalist approaches in English. She explains the complexities of the theories and their terms using simple language with numerous examples. The book includes an overview of how the theories developed, illustrations of the main ideas and specific applications to translator training, literary translation, interpreting and ethics. The survey concludes with a concise review of the criticisms that have been made of the theories together with perspectives for the future development of functionalist approaches. **The**

Angela Giallongo, 2018-06-11. This book provides an exploration of the historical conditions that gradually defined subordinating symbols and conflictual values in social relations between the sexes. It reveals how snakes and the gelid eyes of Medusa, the archetypal snake woman, have reverberated across the visual arts and written sources throughout the ages in association with negative emotions: fear, anger, scorn, and shame. The outcomes and implications of the disturbing correlation between the dangerous female gaze, the malignitas of the snake, and the lethal power of menstruation that have been woven through the fabric of the Western imaginary are analysed here. This analysis reveals an intriguing history of female reptilian hybrids from the pleasing Minoan snake goddesses to the depressing Gorgon Echidna, Amazons, Eve, Melusine, Basilisk, Poison Damsel, Catoblepas, and Sadako Samara, and gives the reader an opportunity to explore things that never happened but have always been.
