Welcome to the first issue of The Computer Law and Security Report. Until now access to legal and security information has not been available to the computer user and presented accordingly. It has tended to be monopolised by the legal or technical specialist. Now for the first time the situation has changed, with this Report being written exclusively with the non-expert in mind.

We recognise that as a computer user you need information about what is happening in the technological field that may affect your business. This involves not only the provision of current legal commentary but guidance on how to organise your business activities in the face of such developments. This is particularly important in the security area where there is a tremendous need for informed advice.

In The Report you will discover a complete breakdown of all that is happening in this fast-moving field and can be confident that by reading The Report nothing of importance will be missed. You might even discover answers to questions that you did not know you should be asking.

The Character of Consent Meg Leta Jones, 2024-06-18 The rich untold origin story of the ubiquitous web cookie what's wrong with it why it's being retired and how we can do better Consent pop ups continually ask us to download cookies to our computers but is this all too familiar form of privacy protection effective No Meg Leta Jones explains in *The Character of Consent* rather than promote functionality privacy and decentralization cookie technology has instead made the internet invasive limited and clunky Good thing then that the cookie is set for retirement in 2024 In this eye opening book Jones tells the little known story of this broken consent arrangement tracing it back to the major transnational conflicts around digital consent over the last twenty five years What she finds is that the policy controversy is not in fact an information crisis it's an identity crisis Instead of asking how people consent Jones asks who exactly is consenting and to what Packed into those cookie pop ups she explains are three distinct areas of law with three different characters who can consent Within mainly European data protection law the data subject consents Within communication privacy law the user consents And within consumer protection law the privacy consumer consents These areas of law have very different histories motivations institutional structures expertise and strategies so consent and the characters who can consent plays a unique role in those areas of law *The Character of Consent* gives each computer character its due taking us back to their origin stories within the legal history of computing By doing so Jones provides alternative ways of understanding the core issues within the consent dilemma More importantly she offers bold new

approaches to creating and adopting better tech policies in the future **Seeking Security** G R Sullivan, Ian Dennis, 2012-04-13 Many academic criminal lawyers and criminal law theorists seek to resolve the optimum conditions for a criminal law fit to serve a liberal democracy Typical wish lists include a criminal law that intervenes against any given individual only when there is a reasonable suspicion that s he has caused harm to the legally protected interests of another or was on the brink of doing so Until there is conduct that gives rise to a reasonable suspicion of criminal conduct by an individual s he should be allowed to go about his or her business free from covert surveillance or other forms of intrusion All elements of crimes should be proved beyond any reasonable doubt Any punishment should be proportionate to the gravity of the wrongdoing and when the offender has served this punishment the account should be cleared and good standing recovered Seeking Security explores the gap between the normative aspirations of liberal criminal law scholarship and the current criminal law and practice of Anglophone jurisdictions The concern with security and risk which in large part explains the disconnection between theory and practice seems set to stay and is a major challenge to the form and relevance of a large part of criminal law scholarship Illegal Online File Sharing, Decision-Analysis, and the Pricing of Digital Goods

European Unfair Competition Law Rogier de Vrey, 2005-12-01 The main aim of this book is to discuss the state of unfair competition law in the European Union In this respect the various efforts that have been made in the past to come to harmonization of this area of law and the reasons that they were only partially successful are reviewed In addition the International and European regulations that refer to unfair competition like e g the Paris Convention the TRIPs and the

recent 2004 Unfair Commercial Practices Directive are discussed Also an overview is given of the unfair competition laws in the United Kingdom Germany and the Netherlands with respect to the problem areas of slavish imitation misleading advertising denigrating one's competitor trade secrets and finally misappropriation of valuable trade assets Unfair competition law is traditionally considered part of intellectual property law Not only the relation of unfair competition law to intellectual property laws are therefore part of the discussion but also the areas of consumer protection law since unfair competition law is partly orientated towards consumer protection and competition as an economic concept is the topic of thorough review
