The Culture Of Fengshui In Korea:

The Culture of Fengshui in Korea Hong-key Yoon, 2008 The term Fengshui which literally means wind and water is the ancient Chinese art of selecting an auspicious site to provide the most harmonious relationship between human and earth. The term is generally translated as geomancy and has had a deep and extensive impact on Korean Chinese and other East Asian cultures. Hong key Yoon's book explores the nature of geomantic principles and the culture of practicing them in Korean cultural contexts. Yoon first examines the nature and historical background of geomancy, geomantic principles for auspicious sites, houses, graves, and cities, and provides an interpretation of geomantic principles as practiced in Korea. Yoon looks at geomancy's influence on cartography, religion, and philosophy, and urban development in both Korea and China. Finally, Yoon debates the role of geomancy in the iconographical warfare between Japanese colonialism and Korean nationalism, as it affected the cultural landscape of Kyongbok Palace in Seoul.

He clearly analyzes the nature and historical background of geomancy, the principles for selecting auspicious sites, and provides an extensive interpretation of geomantic principles as practiced in Korea. The impacts of geomancy on traditional cartography, religion, urban development, and finally iconographical warfare are all discussed in great detail.

Research in Scientific Feng Shui and the Built Environment Michael Y. MAK, Albert Ting-pat SO, 2009-02-01 Feng Shui is a body of ancient Chinese knowledge that aims at creating a harmony between environment, buildings, and people. It represented the most significant set of architectural theory and practice in Chinese history. Feng Shui knowledge reflected the traditional Chinese attitudes towards the natural and built environment. With a desire to improve the relationship between human and the environment, there is an increasing interest for architects, building professionals, and other property practitioners to apply the concepts of Feng Shui in building design. As Feng Shui knowledge represents a holistic view in creating a harmonized built environment, research into the application of Feng Shui to the built environment needs to be addressed.

P'ungsu Hong-key Yoon, 2017-12-04 The first scholarly book to address Korean geomancy through an interdisciplinary lens. This book is a milestone in the history of academic research on the development and role of geomancy, fengshui, in Chinese and P'ungsu in Korean in Korean culture and society. As the first interdisciplinary work of its kind, it investigates many topics in geomancy studies that have never been previously explored and contains contributions from a number of disciplines, including geography, historical studies, environmental science, architecture, landscape architecture, religious studies, and psychoanalysis. While almost all books in English about geomancy are addressed to general readers as practical guides for divining auspicious locations, *P'ungsu* is a work of rigorous scholarship that documents, analyzes, and explains past and current practices of geomancy. Its readers will better understand the impact of geomancy on the Korean cultural landscape and appreciate the significant ecological principles embedded in the geomantic

traditions of Korea while researchers will discover new insights and inspirations for future research on geomancy not only in Korea but in China and elsewhere

Five Classics of Fengshui Michael Paton, 2013-06-17 In *Five Classics of Fengshui* Michael Paton traces the theoretical development of this form of spiritual geography through full translations of major texts the Burial Classic of Qing Wu Book of Burial Yellow Emperor's Classic of House Siting Twenty Four Difficult Problems and Water Dragon Classic This theoretical development is analysed through the lens of history philosophy and sociology of science in an attempt to address Joseph Needham's conundrum of the great beauty of the siting in traditional China being based on such a grossly superstitious system and to understand what part fengshui played in the environmental history of China

A Place to Live, 2018-12-31 A Place to Live brings together in a single volume an introduction to Yi Chung hwan's 1690 1756 T'aengniji Treatise on Choosing Settlement one of the most widely read and influential of the Korean classics and an annotated translation of the text including the author's postscript Yi composed the T'aengniji in the 1750s a time when despite King Y'ngjo's 1724 1776 policy of impartiality the scholar gentry

class continued to identify strongly with literati factions and to participate in the political scene as such. A prominent secretary who had his career cut short because of suspected involvement in one of the largest literati purges at court Yi endured long periods of living in exile before finishing the *T'aengniji* in his early sixties. The treatise his only substantial work is based largely on his travels throughout the Korean peninsula and presents not only his views on the desirability of places for settlement but also his opinions on contemporary matters and criticism of government policy. As a result the *T'aengniji* circulated as an anonymous work for many years. Employing the latest research on *T'aengniji* manuscripts translator Inshil Yoon maintains in her introduction that the original title of the treatise was *Sadaebu kag ch* *Livable Places for the Scholar Gentry* she goes on to discuss in detail its reception by premodern and contemporary scholars and the treatise's ongoing popularity as evidenced by the numerous versions and translations done in this and the previous century its having been made into a novel and current usage of *t'aengniji* as a noun meaning regional geography or travelogue. The present translation is based on the Chosŏn Kwangmunhoe edition.

Future Yet to Come Sonja M. Kim, Robert Ji-Song Ku, 2021-09-30 South Korea is home to cutting edge electronics state of the art medical facilities and ubiquitous high speed internet. The country's meteoric rise from the ashes of the Korean War 1950-1953 to rank among the world's most technologically advanced societies is often attributed to state led promotion of science and technology in nation building projects. With chapters that discuss Korea's dynastic past foreign occupations Cold War geopolitics postwar rehabilitation in the twentieth century and the contemporary neoliberal moment *Future Yet to Come* argues that a longer historical arc and broader disciplinary approach better elucidate these transformations. The book's contributors illuminate the sociotechnical imaginaries that promoted sustained and contested Korea's scientific medical and technological projects in realizing desired futures. Focusing special attention on visual culture and the life sciences the essays present competing visions held by individuals and institutions of power in the use and purpose of scientific engagements. They demonstrate Korean specificities in culture and language and the myriad social political spatial and symbolic arrangements that shaped incorporations of and changes to existing systems of knowledge and material practices. Whether discussing moral epistemologies imperialist or developmentalist thrusts in public health regimes or new configurations of the self enabled by bio industries and media technologies the book expands both the regional and global understanding of translation accommodation and transfer. Tracing imaginaries across the vicissitudes of Korea's past recalls their history and makes visible their shifts and resilience in dynamic political economies. *Future Yet to Come* reminds us how deeply intertwined science medicine and technology are to not only our polities corporations and societies but also the human condition. Bridging histories of science and medicine with anthropologies of technology and the arts the book will appeal to students and scholars of Korean and East Asian studies as well as those with interests in the comparative history of medicine STS society and technology studies art history media studies transnationalism diaspora and postcolonialism.
