Finance Fictions Arne De Boever, 2018-03-06 Finance Fictions takes the measure of what it means to live in a world ruled by high finance by examining the tension between psychosis and realism that plays out in the contemporary finance novel When the things traded at the center of the economy cease to be things at all but highly abstracted speculations how do we come to see the real What sorts of narrative can accurately approach the actual workings of a neoliberal economy marked by accelerating cycles of market crashes economic and political crisis and austerity Revisiting such twentieth century classics of the genre as Tom Wolfe's Bonfire of the Vanities and Bret Easton Ellis's American Psycho De Boever argues that the twenty first century is witnessing the birth of a new kind of realistic novel that can make sense of complex financial instruments like collateralized debt obligations credit default swaps and digital algorithms operating at speeds faster than what human beings or computers can record If in 1989 Wolfe could still urge novelists to work harder to tame the billion footed beast of reality today's economic reality confronts us with a difference that is qualitative rather than quantitative a new financial ontology requiring new modes of thinking and writing Mobilizing the philosophical thought of Quentin Meillassoux in the close reading of finance novels by Robert Harris Michel Houellebecq Ben Lerner and less well known works of conceptual writing such as Mathew Timmons Credit Finance Fictions argues that realism is in for a speculative update if it wants to take on the contemporary economy and if whose implications turn out to be deeply political Part literary study and part philosophical inquiry Finance

Fictions seeks to contribute to a new mindset for creative and critical work on finance in the twenty first century **Fables of the Novel** Warren F. Motte, 2003 Readers of the contemporary novel in France are witnessing the most astonishing reinvigoration of narrative prose since the New Novel of the 1950s In the last few years bold innovative and richly compelling novels have been written by a variety of young writers These texts question traditional strategies of character plot theme and message and they demand new strategies of reading too Choosing ten novels published during the 1990s as examples of that trend Warren Motte traces the resurgence of the novel in France He argues that each of the novels under consideration here quite apart from what other stories it tells presents a fable of the novel that deals with the genre s possibilities limitations and future as a cultural form *Victorian England's Bestselling Author* Stephen Basdeo, Mya Driver, 2022-11-17 George W M Reynolds 1814-79 was one of the biggest selling novelists of the Victorian era He was the author of over 58 novels and short stories and his penny blood *The Mysteries of London* serialised in weekly numbers between 1844 and 1848 sold over a million copies A controversial figure in his lifetime Reynolds s *Mysteries* and its follow up *The Mysteries of the Court of London* 1849-56 contained tales of crime vice and highly sexualised scenes For this reason Charles Dickens remarked that Reynolds s name was one with which no lady s and no gentleman s should be associated Yet Reynolds was much more than just a novelist he was lauded by the working classes as their champion and campaigned for universal suffrage To further the working classes cause he established two newspapers Reynolds s *Political Instructor* and Reynolds s *Weekly Newspaper* The latter newspaper as Karl Marx recognized became the principal organ of radical and labour politics This book provides a biography of Reynolds and reproduces his editorials from Reynolds s *Political Instructor* as well as excerpts from his fiction

Production of Bloomsbury Matthew Ingleby,2018-11-05 This study explores the role of fiction in the social production of the West Central district of London in the nineteenth century It tells a new history of the novel from a local geographical perspective tracing developments in the form as it engaged with Bloomsbury in the period it emerged as the city's dominant literary zone A neighbourhood that was subject simultaneously to socio-economic decline and cultural ascent fiction set in Bloomsbury is shown to have reconceived the area's marginality as potential autonomy Drawing on sociological theory this

book critically historicizes Bloomsbury's trajectory to show that its association with the intellectual fraction known as the Bloomsbury Group at the beginning of the twentieth century was symptomatic rather than exceptional. From the 1820s onwards, writers positioned themselves socially within the metropolitan geography they projected through their fiction. As Bloomsbury became increasingly identified with the cultural capital of writers rather than the economic capital of established wealth, writers subtly affiliated themselves with the area, and the figure of the writer and Bloomsbury became symbolically conflated.
