Comparative Archaeologies Ludomir R Lozny, 2011-04-06 Archaeology as with all of the social sciences has always been characterized by competing theoretical propositions based on diverse bodies of locally acquired data In order to fulfill local regional expectations different goals have been assigned to the practitioners of Archaeology in different regions These goals might be entrenched in local politics or social expectations behind cultural heritage research This comprehensive book explores regional archaeologies from a sociological perspective to identify and explain regional differences in archaeological practice as well as their existing similarities This work covers not only the currently dominant Anglo American archaeological paradigm but also Latin America Western and Eastern Europe Asia and Africa all of which have developed their own unique archaeological traditions The contributions in this work cover these alternative archaeologies in the context of their own geographical political and socio economic settings as well as the context of the currently accepted mainstream approaches

RECREATING ARTEFACTS AND ANCIENT SKILLS: FROM EXPERIMENT TO INTERPRETATION Monica Mărgărit, Adina Boroneanț, 2022-03-01 This volume focuses on the role and means of archaeological experimentation in understanding the processes involved in the manufacture and use of past artifacts When asking for contributions we suggested the five stages of an experimental approach as main themes 1 Selection and acquisition of raw material identical to those present in the archaeological assemblages 2 Production of replicas following the technological transformation schemes identified by the direct study of archaeological items 3 Experimental use as indicated by the publications ethnographic comparisons or as suggested by the morphology use wear evolution of the archaeological items 4 Microscopical analysis of use wear patterns 5 Comparison of experimental data with archaeological data in order to validate the existing hypotheses on the way they were manufactured and used by the human communities A second aim was that the invited authors to have various archaeological backgrounds and cover a broad spatial and temporal interval As a result this volume comprises 17 studies organized in three sections dictated by the various aspects of experimental archaeology they represent from the more traditional experimental replication understanding and interpretation of artefact functionality and relatively recent and less trodden directions in experimental archaeology It also comes to show that experimental archaeology is as well suited for Palaeolithic studies as it is for the Neo Eneolithic and the Bronze Age Although most papers refer geographically to Europe interesting contributions take us to Argentina and Australia Acest volum se concentrează pe rolul și mijloacele experimentelor arheologice în alegerea proceselor implicate în fabricarea și

utilizarea artefactelor din trecut Am invitat o serie de specialiști să contribuie cu studii care să testeze ipotezele teoretice existente dar și altele care să aducă abordări inovatoare Când am solicitat contribuții am sugerat ca teme principale cele cinci etape ale demersului experimental 1 Selectarea și achiziționarea de materii prime identice cu cele prezente în ansamblurile arheologice 2 Realizarea de replici urmând schemele de transformare tehnologic identificate prin studiul direct al ansamblurilor arheologice 3 Utilizarea experimentală după cum este indicat de publicații comparative etnografice sau sugerat de evoluția uzurii pe artefactele arheologice 4 Analiza microscopică a modelelor de uzur 5 Compararea datelor experimentale cu datele arheologice în vederea validării ipotezelor existente privind fabricarea și utilizarea lor de către comunitățile umane Un al doilea scop al volumului a fost ca autorii invitați să provină din diferite medii arheologice și să acopere un interval spațial și temporal larg A rezultat un volum cuprinzând 17 studii organizate în trei secțiuni dictate de diversele aspecte ale arheologiei experimentale replicarea experimentală la nivel tehnologic în alegerea și interpretarea funcționalității artefactelor și direcțiile relativ recente interdisciplinare în cadrul experimentului arheologic De asemenea volumul ne a arătat că arheologia experimentală este la fel de potrivită pentru studiile paleolitice ca și pentru neo-eneolitic și epoca bronzului Deși majoritatea lucrurilor se referă geografic la Europa contribuții interesante vin din Argentina sau Australia

Paradigm Found Kristian Kristiansen, Ladislav Šmejda, Jan Turek, 2015-01-21 Paradigm Found brings together papers by renowned researchers from across Europe Asia and America to discuss a selection of pressing issues in current archaeological theory and method The book also reviews the effects and potential of various theoretical stances in the context of prehistoric archaeology The 23 papers provide a discussion of the issues currently reappearing in the focal point of theoretical debates in archaeology such as the role of the discipline in the present day society problems of interpretation in archaeology approaches to the study of social evolution as well as current insights into issues in classification and construction of typologies Taking a fresh and often provocative look at the challenges contemporary archaeology is facing the contributors evaluate the effects of past developments and discuss the impact they are likely to have on future directions in archaeology as an internationally connected discipline In its final part the volume reflects on current thinking on prehistory using case studies from a number of European regions and the Mediterranean from the Neolithic to the Roman Period The volume represents a tribute to the lifetime achievements of Professor Evén Neustupný a distinguished Czech archaeologist who contributed to the advancement of prehistoric studies in Europe and to archaeological theory and method in particular

research in the fields of anthropology archaeology and cognitive science clearly suggests that the development of a material culture in prehistory was a serious contribution to the mathematization of the human mind An underestimated interface in this process as cognitive and philosophical studies suggest was the capability to perceive the external world in a metaphorical way This book uses several examples to tell this story It does not claim the right to present a universal story applicable for the whole human species although it also questions that universality The cornerstone of the story is structured by the relationship between body language and material culture The examples presented in this book however also allow us to contemplate a less universal phenomenon the similarities and differences between Near Eastern and European culture in the period of the development of farming As such this book also investigates whether clay tokens an invention originated from Near Eastern societies were also responsible for the development of mathematical abilities in prehistoric societies in Europe In Europe however the lack of material representations of numbers in the form of small objects was replaced by linear concepts Linearity from its simple manifestations in the monumental form to its complex use in later megalithic structures requires more thought because it served not only as an ephemeral symbol and a metaphor but also as a practical tool in building anthropogenic spaces Only when we see a metaphor in the omnipresent linearity can we understand it properly in combination with the cosmologic aspects of architecture the role of the human body and the concept of numbers As such the book distinguishes between two dichotomous development paths of mathematization and numerosity in Europe and the Near East the birthplace of farming the measuring stick metaphor and the object collection metaphor The book also discusses further transformations of the measuring stick metaphor into more rational concepts throughout the course of technological developments in Europe

European Prehistory Sarunas Milisauskas, 2002 The study of European archaeology dates back to the 19th century but the number of archaeologists projects and publications has increased greatly during the last three decades With the collapse of the Soviet Union and the restructuring of several countries archaeology in Europe has more opportunity for interaction and research than previously was possible This comprehensive volume covers the Prehistoric period in Europe from the earliest appearance of humans to the rise of the Roman Empire and includes the Paleolithic Mesolithic Bronze and Iron Ages Throughout these periods the major developments and explored using the archaeological data including technology trade settlement warfare ritual Using methodologies and theories that were previously unknown in Europe decades ago new discoveries and arguments are included in the research as well as reevaluations of previous discoveries This work also includes a present geographical summary and how it impacts the current archaeological discoveries and research being conducted

European Prehistory A Survey includes many comprehensive maps and site photos It will be a vital resource to prehistoric archaeologists anthropologists and historians in and outside of Europe
