It is vital for the resolution of a great many disputes in court concerning personal injuries, medical negligence, criminal law, and coronial issues, as well as in the provision of both diagnoses and treatment in medicine. This book offers a vital analysis of issues such as causation in law and medicine, issues of causal responsibility, agency and harm in criminal law, causation in forensic medicine, scientific and statistical approaches to causation, proof of cause, influence and effect, and causal responsibility in tort law. Including contributions from a number of distinguished doctors, lawyers, and scientists, it will be of great interest and value to academics and practitioners alike.
