South African Military Application Form 2015:

Researching the Military Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02 Researching the Military focuses on the experiences of researchers who study the military around the world. It explores the historical, social, institutional, and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy. More than merely analyzing research experiences yet necessarily including them, it is also about the experiences of researchers, their position with regard to the object of their studies, the institutional context where they work, and the way their research impacts the academic and policy making fields in the respective countries. The common theme to the various chapters is reflexivity, a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface. By collecting diverse experiences of researchers from across the world, this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena. This book will be of much interest to students of military studies, research methods, sociology, social anthropology, and security studies in general.

Sociology in South Africa R. Sooryamoorthy, 2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology. Providing a holistic picture of the subject both as it is taught in universities and as a field of research, it reveals the trajectories of a discipline in a challenging socio-political context. With the support of historical and scientometric data, it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature, direction, and foci of sociological research in the country. The author shows how during the apartheid era, sociology was professionally fragmented and divided along language and race lines. It was, however, able to flourish with the advent of democracy in 1994 and has become a unique academic movement. This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa.

The Handbook of African Defence and Armed Forces Evert Kleynhans, Marco Wyss, 2025-03-01 The Handbook of African Defence and Armed Forces provides the first in-depth and multifaceted analysis of the evolution and current state of national defence policies, strategies, doctrines, capabilities, security challenges, and strategic responses of African states and their armed forces. Geographically, these aspects are investigated at the national, sub-regional, and regional levels. Chronologically, they are analysed against the backdrop of the superpower withdrawal from the continent in the 1990s and the so-called New Scramble for Africa, which has seen a crescendo of renewed great power interest in the continent's resources as well as its strategic role, location, and relevance since the 2000s. The book takes a bottom-up and African-centric approach and is organized around five key themes: i) the differing security outlooks and defence policies of African powers within the region and the different sub-regions; ii) the strategies, doctrines, transformation, and employment of African armed forces; iii) the relationship between African armed forces with sub-regional, regional, and international organizations; iv) the challenges that African states and their armed forces have been facing and their strategic responses; and

The Economics of Defense Industry Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate

capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis

Cultural Heritage Management in Africa George Okello Abungu, Webber Ndoro, 2022-12-15 Cultural Heritage Management in Africa explores the diversity of Africa's cultural heritage by analysing how and why this heritage has been managed and by considering the factors that continue to influence management strategies and systems throughout the African continent. Including contributions from prominent scholars and heritage professionals working across Africa, the volume presents critical contemporary perspectives on the state of heritage in the area. Chapters analyse the practices that emanated from different colonial experiences and consider what impact these had and continue to have on the management of African heritage. It also critically examines the ideological influence of independence movements on the African continent's management and remembering of heritage and considers whether there are any differences in heritage management between countries that experienced armed conflicts and those that did not. The volume will be the first to critically assess the state of heritage management now at a time when vital conversations about the balance between heritage and development is ongoing and the actions of new players have begun to impact the management and practice of heritage in the region. Cultural Heritage Management in Africa will be essential reading for those engaged in the study of museums and heritage development, archaeology, anthropology, history and African studies. It will also be of interest to heritage and museum professionals who wish to learn more about the decolonisation of heritage.

Is America Safe? Don Philpott, 2019-01-31 As potential targets such as military facilities, symbols of democracy, government buildings and infrastructure are hardened against possible terrorist attacks, terrorists will shift to softer targets: churches, schools, malls, mass entertainment centers, high-rise apartments, transportation centers and energy facilities. Their goal will be to disrupt or destroy our economy, impose fear and uncertainty, break our national will and deflect our attention and support from the Middle East. We could wait for it to happen or we can prepare now. This new book empowers Americans by providing them with the knowledge and skills needed to understand terrorist strategies, which in turn allow each of us to contribute to disrupting the terrorists' intended goals through observing and reporting suspicious activity, reducing target vulnerabilities and minimizing casualties through education and preparation. The authors define terrorism and its origins and describe present-day organizations where they operate, what their philosophies entail and what their motivation and objectives are. They review different terrorist tactics and their desired effects, providing readers with guidelines and checklists for surviving them. Knowing how to prepare for and how to survive an attack is a step toward marginalizing intended casualty rates, psychological impacts and propaganda values. At the same time, the lifesaving skills presented in this book may also be used in naturally occurring catastrophic events such as hurricanes, tornadoes, floods or earthquakes.
