refers to the variety of species inhabiting Planet Earth It is essential to the well being of the planet There is now a scientific
consensus around the current ongoing crisis in biodiversity arising from both climate change and human activities Experts
believe we are in the middle of a mass extinction of biodiversity with devastating consequences for our planet Accounting for
Biodiversity explores the need for companies to actively protect conserve and improve biodiversity within their sphere of
operation The 14 chapters written by a selected team of experts investigate the ways in which companies are embracing
their responsibility through a variety of biodiversity initiatives and innovative models designed to improve the recording
reporting and valuing of biodiversity Global case studies look at biodiversity accounting in Africa Asia Australasia Europe and
South America Overall this book provides a comprehensive set of reflections on accounting for biodiversity and
recommendations for the future This book is essential reading for all those interested in the contribution that accounting can
make to the preservation of biodiversity As we see increasing awareness of the importance of sustainability and ecological
responsibility in business activity it is relevant and should prove informative to students managers accountants and those in
business more generally It is also important for all those interested in conserving biodiversity The United States Catalog
