Models for the Web-Graph Konstantin Avrachenkov, Debora Donato, Nelly Litvak, 2009-01-26 This volume constitutes the refereed proceedings of the 6th Workshop on Algorithms and Models for the Web Graph WAW 2009 held in Barcelona in February 2009. The World Wide Web has become part of our everyday life and information retrieval and data mining on the Web are now of enormous practical interest. The algorithms supporting these activities combine the view of the Web as a text repository and as a graph induced in various ways by links among pages, links among hosts or other similar networks. We also witness an increasing role of the second generation Web based applications Web 2.0 such as social networking sites and wiki sites. The workshop program consisted of 14 regular papers and two invited talks. The invited talks were given by Ravi Kumar, Yahoo Research USA and Jos e Fernando Mendes, University of Aveiro, Portugal. The regular papers went through a thorough review process. The workshop papers were naturally clustered in three sections: Graph Models for Complex Networks, PageRank and Web Graph and Social Networks, and Search. The first section lays a foundation for theoretical and empirical analysis of the Web graph and Web 2.0 graphs.
