Morbidity and Mortality Weekly Report ,1994 **Morbidity and Mortality Weekly Report** ,1977 **Public Health Reports** ,1946 **Regulating Food-borne Illness** Richard Hyde,2015-08-27 When faced with tackling food borne illness regulators have a number of competing goals They must investigate in order to discover the source of the illness Once the source is identified they must take action to prevent further cases of illness occurring Finally once the illness is under control they may wish to take enforcement action against those responsible Regulating Food Borne Illness uses interviews and documentary analysis to examine the actions of regulators and considers how they balance these three tasks Central to the regulators role is the collection of information Without information about the source control or enforcement action cannot be taken Investigation must therefore take place to produce the necessary information Utilising theoretical frameworks drawn from regulation and biosecurity Regulating Food Borne Illness shows that control is prioritised and that investigatory steps are chosen in order to ensure that the information necessary for control rather than enforcement is collected This has the effect of reducing the possibility that enforcement action can be taken The difficulty of evidence gathering and case building in food borne illness cases is exposed and the author considers the methods aimed at reducing the difficulty of bringing successful enforcement action **Reprint from the Public Health Reports** United States. employers practiced on the public Employed in a wide variety of business enterprises supermarkets restaurants fish markets department stores gas stations drug stores pet stores and many more these workers pull back the curtain and reveal the hidden recesses of the American marketplace Blumberg documents these deceptions in numerous vivid stories providing readers with a trenchant handbook on survival in America He tells of stores that routinely mark prices up before a sale gas stations that sell regular gas as high test auto mechanics who spray paint customers old car parts and then charge them for new parts in one gas stations the workers claimed that the mechanic s best tool was his paint can and pharmacists who sell generic drugs and charge name brand prices But equally important he provides an insightful analysis of why deception pervades the American marketplace Though at times amusing The Predatory Society is also frequently disturbing for what it says about private capitalism how dishonesty is all but built into the American marketplace and how this dishonesty has potentially disastrous effects on trust and community in our society
