3. Install the replacement water filter by following steps 2 through 5 in the "Install the Water Filter" section.

ICE MAKER USE

How Your Ice Maker Works

When you first start your ice maker, the water pan will fill and the system will rinse itself before starting to make ice. The rinsing process takes about 5 minutes.

Under normal operating conditions, the ice maker will cycle at preset temperatures. The ice level sensor located in the ice storage bin will monitor the ice levels.

IMPORTANT: If the water supply to the ice maker is turned off, be sure to set the ice maker control to OFF.

The Ice Making Process

1. Water is constantly circulated over a freezing plate. As the water freezes into ice, the minerals in the water are rejected. This produces a sheet of ice with a low mineral content.

2. When the desired thickness is reached, the ice sheet is released and slides onto a cutter grid. The grid divides the sheet into individual cubes.

3. The water containing the rejected minerals is drained after each freezing cycle.
4. Fresh water enters the machine for the next ice making cycle.
5. Cubes fall into the storage bin. When the bin is full, the ice maker shuts off automatically and restarts when more ice is needed. The ice bin is not refrigerated, and some melting will occur. The amount of melting varies with room temperature.

NOTE: As the room and water temperatures vary, so will the amount of ice produced and stored. This means that higher operating temperatures result in reduced ice production.

Using the Controls

1. To start ice production, press ON/OFF.
2. To stop ice maker operation, press ON/OFF.

NOTES:

- Pressing the On/Off button does not shut off power to the ice maker.
- Allow 24 hours to produce the first batch of ice. Discard the first 2 batches produced.

Fast Ice Mode

Select the Fast Ice feature when you have an upcoming need for a large amount of ice and the ice bin is low or empty. Fast ice mode will produce a greater quantity of ice in a 24-hour period.

- Press FAST ICE while the ice maker is on. The indicator light will illuminate.
- Press FAST ICE again to turn off the Fast Ice feature. The indicator light will turn off.
- The Fast Ice mode will be on when you first turn on the product. It will turn off after 24 hours. To turn Fast Ice back on, press FAST ICE.
