White Mistress Black Slave Stories:

The Foremother Figure in Early Black Women's Literature Jacqueline Bryant, 2018-10-29 Originally published in 1999 The Foremother Figure in Early Black Women's Literature looks at how stereotypical foremother figure exists in nineteenth century American literature The book argues that older black woman portrayed in early black women's works differs significantly from the older black women portrayed in early white women's works The foremother figure then emerging in early black women's fiction revises the stereotypical mother figure in early white women's fiction In the context of the mulatta heroine the foremother produces minimal language that through an Afrocentric rhetoric distinguishes her from the stereotypical mother and thus links her peripheral role and unusual behaviour to cultural continuity and radical uplift *Just a Sister Away* Renita J. Weems, 2025-05-01 The Essence bestselling author of *Listening for God* reveals the timeless connection between today's women and their biblical sisters and how to live a better life because of it

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative
