Sound Ideas Aden Evens, A highly original approach to the philosophy of musical experience Literature: Structure, Sound, and Sense Laurence Perrine, 1974 *The Second Sense* Robin Maconie, 2002-05-07 In a visual culture hearing is the second sense and music is the art of hearing Kandinsky believed that music transcended painting and visual representation because it had the power to act directly and invisibly on the human spirit Because it is the only art to deal unequivocally with the real world of sound and its attendant perceptions of time motion and human mortality music remains a powerful and often controversial influence on human behavior Defining music in the broadest sense as any acoustic activity intended to influence the behavior of others and written in a clear conversational style for a non specialist readership *The Second Sense* draws on over 100 examples of recorded musical sources from throat singing to Beethoven and from traditional Japan to Boulez including a great many popular classics On the basis that Everything you hear is true true of yourself true of the music and true of the relationship between what you hear and how you hear it the author teases out the signs symbols and patterns of thought that arise from the way people hear the sounds people make and the instruments and environments that are designed and constructed to enhance the listening experience Maconie aims to do for music what Klee and Kandinsky did for art education and Marshall McLuhan for media studies Low-Frequency Sound and Marine Mammals National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Low-Frequency Sound and Marine Mammals, 1994-02-01 This volume reviews the current state of knowledge regarding the effects of low frequency sound on marine mammals and makes recommendations for research In addition the book describes current federal regulations prescribed under the Marine Mammal Protection Act that govern the taking of marine mammals by scientific research activities and it recommends changes to expedite the regulatory process dealing with scientific research activities **Sound and the Ancient Senses** Shane Butler, Sarah Nooter, 2018-10-03 Sound leaves no ruins and no residues even though it is experienced constantly It is ubiquitous but fleeting Even silence has sound even absence resonates *Sound and the Ancient Senses* aims to hear the lost sounds of antiquity from the sounds of the human body to those of the gods from the bathhouse to the Forum from the chirp of a cicada to the music of the spheres Sound plays so great a role in shaping our environments as to make it a crucial sounding board for thinking about space and ecology

emotions and experience mortality and the divine orality and textuality and the self and its connection to others From antiquity to the present day poets and philosophers have strained to hear the ways that sounds structure our world and identities This volume looks at theories and practices of hearing and producing sounds in ritual contexts medicine mourning music poetry drama erotics philosophy rhetoric linguistics vocality and on the page and shows how ancient ideas of sound still shape how and what we hear today As the first comprehensive introduction to the soundscapes of antiquity this volume makes a significant contribution to the burgeoning fields of sound and voice studies and is the final volume of the series *The Senses in Antiquity*
