Development of Criteria for Acceptable Previous Cargoes for Fats and Oils Food and Agriculture Organization of the United Nations, 2007-01-01 There are insufficient sea going vessels reserved for the transport of foodstuffs to cater for

the expanding trade in fats and oils intended for or likely to be used for human consumption and it is both impractical and uneconomic to expect sea going bulk tankers to return empty to their original port of lading A practical solution adopted by the industry involves the bulk transport of fats and oils in tanks that are not exclusively reserved for the transport of foodstuffs This practice means that many chemicals are potential previous cargoes to edible fats and oils Efforts are ongoing to ensure these cargoes are not contaminated with previous ones and FAO and WHO are currently working on the provision of advice on the establishment of criteria for substances to be included in the Codex List of Acceptable Previous Cargoes this technical meeting was called so that all relevant matters would be considered *ERDA Energy Research Abstracts* United States. Artificial Intelligence Jose A. Lozano,José A. Gámez,José A. Moreno-Pérez,2011-10-30 This book constitutes the refereed proceedings of the 14th Conference of the Spanish Association for Artificial Intelligence CAEPIA 2009 held in La Laguna Canary Islands Spain in November 2011 The 50 revised full papers presented were carefully selected from 149 submissions The papers are organized in topical sections on agent based and multi agent systems machine learning knowledge representation logic search and planning multidisciplinary topics and applications vision and robotics soft computing Web intelligence and information retrieval *Developmental, Modal, and Pathological Variation — Linguistic and Cognitive Profiles for Speakers of Linguistically Proximal Languages and Varieties* Kleanthes K. Grohmann,Maria Kambanaros,Evelina Leivada,2018-11-08 One significant area of research in the multifaceted field of bilingualism over the past two decades has been the demonstration validation and account of the so called bilingual advantage This refers to the hypothesis that bilingual speakers have advanced abilities in executive functions and other domains of human cognition Such cognitive

benefits of bilingualism have an impact on the processing mechanisms active during language acquisition in a way that results in language variation Within bilingual populations the notion of language proximity or linguistic distance is also of key importance for deriving variation In addition sociolinguistic factors can invest the process of language development and its outcome with an additional layer of complexity such as schooling language dominance competing motivations or the emergence of mesolectal varieties which blur the boundaries of grammatical variants This is particularly relevant for diglossic speech communities bidialectal or bivarietal speakers The defined goal of the present Research Topic is to address whether the bilingual advantage extends to such speakers as well Thus Linguistic and Cognitive Profiles for Speakers of Linguistically Proximal Languages and Varieties become an important matter within Developmental Modal and Pathological Variation

Proceedings of the 3rd International Symposium on Disaster Resilience and Sustainable Development—Volume 3 Indrajit Pal, Anirban Mukhopadhyay, Salvatore G.P.
