Impossible Puzzle Films Miklos Kiss, 2017-01-18 Narrative complexity is a trend in contemporary cinema Since the late 1990s there has been a palpable increase in complex storytelling in movies But how and why do complex movies create perplexity and confusion How do we engage with these challenges And what makes complex stories so attractive By blending film studies narrative theory and cognitive sciences Kiss and Wilemsen look into the relation between complex storytelling and the mind Analysing the effects that different complex narratives have on viewers the book addresses how films like *Donnie Darko* *Mulholland Drive* and *Primer* strategically create complexity and confusion using the specific category of the impossible puzzle film to examine movies that use baffling paradoxes impossible loops and unresolved ambiguities in their stories and storytelling By looking at how these films play on our mind's blind spots this innovative book explains their viewing effects in terms of the mental state of cognitive dissonance that they evoke

Political Species Karsten Ronit, 2024-04-09 In *Political Species* Karsten Ronit expertly argues that evolutionary biology can provide important sources of inspiration for analyzing the proliferation of private actors organizations in domestic and global politics Focusing on the evolution of a diversity of such private actors organizations in politics Ronit emphasizes that individuals are affected by and contribute to societal cultural and political evolution through a range of formal organizations and that societies cultures and politics influence and build upon values and norms transmitted by individuals via these formal organizations By being mindful of these contextual factors and keeping in mind the important research done in the micro and macro perspectives we can gain a better understanding of the diversity of private actors organizations and how they evolve and adapt Evolutionary biology teaches us that over time different varieties emerge specialize and adapt to the ever changing conditions in complex environments before accumulating into new species Much change characterizes these processes of political evolution because actors constantly emerge and add to the existing population of private actors that in one way or another are engaged in politics

The Scientification of Religion Kocku von Stuckrad, 2014-05-21 The enigmatic relation between religion and science still presents a challenge to European societies and to ideas about what it means to be modern This book argues that European secularism rather than pushing back religious truth claims in fact has been religiously productive itself The institutional establishment of new disciplines in the nineteenth century such as religious studies anthropology psychology classical studies and the study of various religious traditions led to a professionalization of knowledge about religion that in turn attributed new meanings to religion This attribution of meaning resulted in the emergence of new religious identities and practices In a dynamic that is closely linked to this discursive change the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning resulting in a special form of scientific religiosity that has gained much influence in the twentieth century Applying methods that come from historical discourse analysis the book demonstrates that religious semantics have been reconfigured in the secular sciences Ultimately the scientification of

religion perpetuated religious truth claims under conditions of secularism **Race and the Scottish Enlightenment** Linda Andersson Burnett, Bruce Buchan, 2025-08-26 How colonialism shaped the Scottish Enlightenment's conception of race and humanity In the decades after 1750 an increasing number of former medical students from the University of Edinburgh construed humanity as a subject of both intellectual curiosity and colonial interest They drew on a shared educational background blending medicine with natural history and moral philosophy in a range of encounters with non European and Indigenous peoples across the globe whom they began to classify as races Focusing on a surprising number of these understudied students this book reveals the gradual predominance of race in Scottish Enlightenment thought Teaching provided a toolbox of concepts and theories for students who went on to careers as military and naval surgeons colonial administrators and natural historians While some such as Mungo Park who traveled in Africa are well known many others such as the long term residents in the Russian Empire Matthew Guthrie and his wife Maria Guthrie or the Caribbean botanist Alexander Anderson are less remembered Among this group were those such as the Pacific traveler Archibald Menzies and the circumnavigator of Australia Robert Brown who are known primarily as botanists rather than as ethnographers Together they formed a global network of colonial travelers and natural historians sharing a common educational background and a growing interest in race **Treating the Body in Medicine and Religion** John J. Fitzgerald, Ashley John

Moyse, 2019-05-09 Modern medicine has produced many wonderful technological breakthroughs that have extended the limits of the frail human body However much of the focus of this medical research has been on the physical often reducing the human being to a biological machine to be examined understood and controlled This book begins by asking whether the modern medical milieu has overly objectified the body unwittingly or not and whether current studies in bioethics are up to the task of restoring a fuller understanding of the human person In response various authors here suggest that a more theological religious approach would be helpful or perhaps even necessary Presenting specific perspectives from Judaism Christianity and Islam the book is divided into three parts Understanding the Body Respecting the Body and The Body at the End of Life A panel of expert contributors including philosophers physicians and theologians and scholars of religion answer key questions such as What is the relationship between body and soul What are our obligations toward human bodies How should medicine respond to suffering and death The resulting text is an interdisciplinary treatise on how medicine can best function in our societies Offering a new way to approach the medical humanities this book will be of keen interest to any scholars with an interest in contemporary religious perspectives on medicine and the body **Curious about George** Rae

Handbook of Contemporary Sociological Theory Seth Abrutyn, 2016-06-22 This Handbook provides the hidden common threads that tie sociological inquiry together and featuring eminent scholars it separates itself from its predecessors in substance and organization Rather than rehashing old debates or longingly gazing at the past this book presents sociologists with new ways of conceptualizing the organization and presentation of sociological theory At the

heart of this Handbook's vision is the twin goals of making theory a viable enterprise by reconceptualizing how we teach theory and keeping theory closely tied to its empirical applications. Three strategies are offered: 1. Elucidating how classic issues like integration or interaction are interrogated today; 2. Presenting a coherent vision of the social levels of reality that theorists work on such as communities, groups, and the self, as well as how the coherence of these levels speaks to the macro-micro link; and 3. Theorizing the social world rather than celebrating theorists or theories that is, one can look at how theory is used holistically to understand the constraints the social world places on our lived experience or the dynamics of social change. Hence, in the second decade of the 21st century, it has become clear that sociology is at a crossroads as the number of theorists and amount of theory available is increasingly unmanageable and unknowable by the vast majority of professionals and students. As such, this Handbook of Contemporary Sociological Theory presents the novice and the expert with the a roadmap for traversing this crossroad and building a more coherent, robust, and cumulative sociology.

Rancher, Farmer, Fisherman Miriam Horn, 2016-09-06. Now a feature length documentary on the Discovery channel narrated by Tom Brokaw. Lush, gorgeously written. A profoundly hopeful book. Tina Rosenberg, winner of the Pulitzer Prize and the National Book Award. A Kirkus Best Book of 2016. Many of the men and women doing today's most consequential environmental work restoring America's grasslands, wildlife, soil, rivers, wetlands, and oceans would not call themselves environmentalists; they would be too uneasy with the connotations of that word. What drives them is their deep love of the land, the iconic terrain where explorers and cowboys, pioneers and riverboat captains forged the American identity. They feel a moral responsibility to preserve this heritage and natural wealth to ensure that their families and communities will continue to thrive. Unfolding as a journey down the Mississippi River, *Rancher, Farmer, Fisherman* tells the stories of five representatives of this stewardship movement: a Montana rancher, a Kansas farmer, a Mississippi riverman, a Louisiana shrimper, and a Gulf fisherman. In exploring their work and family histories and the essential geographies they protect, *Rancher, Farmer, Fisherman* challenges pervasive and powerful myths about American and environmental values.
