

WHAT IS WHMIS?

WHMIS is an information system that prepares workers to work safely with hazardous materials in their workplace.

The main components of WHMIS are hazard identification, product classification, labelling, Material Safety Data Sheets (MSDS), training and education.

Suppliers, employers, and workers all have specified responsibilities in the Hazardous Products Act.

Suppliers must properly label and provide an MSDS for controlled products.

Employers must establish training programs for workers who may be exposed to hazardous products, ensure the products are labelled, and that MSDS information is readily available to workers.

Workers must participate in the training programs and use this information to help them work safely with hazardous materials.
