ADDING LAUNDRY PRODUCTS

IMPORTANT: Do not overfill. Do not overfill the detergent dispenser. It may also result in component malfunction and, over time, buildup of mold or mildew. HE detergents should be low-sudsing and spin-drying to produce the right amount of suds for the best performance.

ADDING HE DETERGENT TO BASKET

Add a measured amount of liquid detergent or single-dose laundry pods into the basket. If using one type of detergent, add the detergent to the basket before adding clothes. If using a combination of liquid detergent and pods, add the pods to the basket before adding clothes.

NOTE: Follow the manufacturer's instructions to determine the amount of laundry products to use.

ADDING LIQUID CHLORINE BLEACH

Do not overfill, dilute, or use more than 1 cup (236 mL) of bleach per cycle with liquid chlorine bleach.

ADDING LIQUID FABRIC SOFTENER

PAUCET

Press to access an infant water stream. Use this feature to pre-soak clothes and other items right in the washer. You can also use this feature to manually add water to the machine as desired.

NOTE: The washer will drain at the beginning of the cycle if a large amount of water is added to the machine. The machine can instantly sense the load size.

NOTE: If the washer detects an out-of-balance condition it may pause and attempt to re-balance. During this time the Pause and Wash status indicators will both briefly illuminate.

WARNING: Do not wash water-resistant or water-repellent-type clothing. Failure to properly follow these instructions may result in an abnormal staining and out-of-balance condition that could result in physical injury, property damage, and/or appliance damage.

CHOOSING THE RIGHT CYCLE

A cycle guide for your washer can be found online at www.whirlpool.com. This document will help identify which cycle to choose for various load types as well as the default cycle options. For example, we recommend using the NORMAL cycle with Warm water for cottons, linens, and mixed-garment loads.

MORE WATER WHEN YOU WANT IT

AUTO SENSING AND DEEP WATER

The washer will adjust the water level to the optimal amount for a High-Efficiency wash of the detected load size.
Press Deep Water to automatically add more water to your wash cycle.
It is recommended to use BULKY ITEMS cycle with Deep Water option for loads where maximum water level is desired.
Expect longer cycle times due to extended fill duration when using the Deep Water option.

CLEANING WITH LESS WATER

The washer has been designed and optimized to provide a thorough cleaning using less water to conserve energy and resources.

As the washer designs and moves the load, the level of the items will settle in the basket. This is normal, and items not indicated that more items should be added.

IMPORTANT: You will not see a full basket of water as with other, less efficient washing machines. It is normal for some of the load to be above the water line.

For detailed installation instruction and maintenance information, writer storage, and transportation tips, please see the Owner's Manual included with your machine.
