**Ski**, 2003-10      **Mountain Weather Research and Forecasting** Fotini K. Chow, Stephan F.J. De Wekker, Bradley J. Snyder, 2012-08-30 This book provides readers with a broad understanding of the fundamental principles driving atmospheric flow over complex terrain and provides historical context for recent developments and future direction for researchers and forecasters The topics in this book are expanded from those presented at the Mountain Weather Workshop which took place in Whistler British Columbia Canada August 5 8 2008 The inspiration for the workshop came from the American Meteorological Society AMS Mountain Meteorology Committee and was designed to bridge the gap between the research and forecasting communities by providing a forum for extended discussion and joint education For academic researchers this book provides some insight into issues important to the forecasting community For the forecasting community this book provides training on fundamentals of atmospheric processes over mountainous regions which are notoriously difficult to predict The book also helps to provide a better understanding of current research and forecast challenges including the latest contributions and advancements to the field The book begins with an overview of mountain weather and forecasting challenges specific to complex terrain followed by chapters that focus on diurnal mountain valley flows that develop under calm conditions and dynamically driven winds under strong forcing The focus then shifts to other phenomena specific to mountain regions Alpine foehn boundary layer and air quality issues orographic precipitation processes and microphysics parameterizations Having covered the major physical processes the book shifts to observation and modelling techniques used in mountain regions including model configuration and parameterizations such as turbulence and model applications in operational forecasting The book concludes with a discussion of the current state of research and forecasting in complex terrain including a vision of how to bridge the gap in the future      **Prioritizing Web Usability** Jakob Nielsen, Hoa Loranger, 2006-04-20 In 2000 Jakob Nielsen the world's leading expert on Web usability published a book that changed how people think about the Web Designing Web Usability New Riders Many applauded A few jeered But everyone listened The best selling usability guru is back and has revisited his classic guide joined forces with Web usability consultant Hoa Loranger and created an updated companion book that covers the essential changes to the Web and usability today Prioritizing Web Usability is the guide for anyone who wants to take their Web site's to next level and make usability a priority Through the authors wisdom experience and hundreds of real world user tests and contemporary Web site critiques you'll learn about site design user experience and usability testing navigation and search capabilities old guidelines and prioritizing usability issues page design and layout content design and more      **Seattle** Fodor's, 2007-11 Detailed and timely information on accommodations restaurants and local attractions highlight these updated travel guides which feature all new covers a two color interior design symbols to indicate budget options must see ratings multi day itineraries Smart Travel Tips helpful bulleted maps tips on transportation guidelines for shopping excursions and other valuable features Original

**Atmospheric Chemistry** Christine S. Sloane, T. W. Tesche, 1991-03-16 This book draws upon the knowledge and experience of modeling experts currently engaged in conducting assessments regarding the predictive strength of atmospheric models. The book covers all of the major important atmospheric areas including large scale models for ozone depletion and global warming, regional scale models for urban smog, ozone and visibility impairment and acid rain as well as accompanying models of cloud processes and biofeedbacks. Atmospheric scientists and regulators should consider this book required reading.

**Lookout** Trina Moyles, 2022-07-26 A page turning memoir about a young woman's grueling revelatory summers working alone in a remote lookout tower and her eyewitness account of the increasingly unpredictable nature of wildfire in the Canadian north. While growing up in Peace River, Alberta, Trina Moyles heard many stories of Lookout Observers, strange eccentric types who spent five month summers alone climbing 100 foot high towers and watching for signs of fire in the surrounding boreal forest. How could you isolate yourself for that long, she wondered. I could never do it, she told herself.

Craving a deeper sense of purpose she left northern Alberta to pursue a decade long career in global humanitarian work After three years in East Africa and newly engaged Trina returned to Peace River with a plan to sponsor her fiance Akello s immigration to Canada Despite her fear of being alone in the woods she applied for a seasonal lookout position and got the job Thus begins Trina s first summer as one of a handful of lookouts scattered throughout Alberta with only a farm dog Holly labeled a domesticated wolf by her former owners to keep her company While searching for smoke Trina unravels under the pressure of a long distance relationship and a dawning awareness of the environmental crisis that climate change is producing in the boreal Through megafires lightning storms and stunning encounters with wildlife she learns to survive at the fire tower by forging deep connections with nature and with an extraordinary community of people dedicated to wildfire detection and combat In isolation she discovers a kind of self awareness and freedom that only solitude can deliver Lookout is a riveting story of loss transformation and belonging to oneself layered with an eyewitness account of the destructive and regenerative power of wildfire in our northern forests
