Physics and the Environment Kyle Forinash, 2017-07-05 *Physics and the Environment* directly connects the physical world to environmental issues that the world is facing today and will face in the future It shows how the first and second laws of thermodynamics limit the efficiencies of fossil fuel energy conversions to less than 100% while also discussing how clever technologies can enhance overall performance It also extensively discusses renewable forms of energy their physical constraints and how we must use science and engineering as tools to solve problems instead of opinion and politics Dr Kyle Forinash takes you on a journey of understanding our mature and well developed technologies for using fossil fuel resources and how we are unlikely to see huge gains in their efficiency as well as why their role in climate change ought to be an argument for their replacement sooner rather than later He also discusses the newest technologies in employing renewable resources and how it is important to understand their physical constraints in order to make a smooth transition to them An entire chapter is dedicated to energy storage a core question in renewable energy as well as another chapter on the technical issues of nuclear energy The book ends with a discussion on how no environmental solution no matter how clever from a technical aspect will succeed if there are cheaper alternative even if those alternatives have undesirable features associated with them

Wild at Heart Alice Outwater, 2019-04-02 Alice Outwater's infectiously readable *Wild at Heart* captures the

essence of ecology Everything is connected and every connection leads to ourselves Alan Weisman author The World Without Us and Countdown A wonderful book Information rich to say the least and the indigenous human connections and portrait of the deep connectivity of nature are both strong elements Jim McClintock author of A Naturalist Goes Fishing Nature on the brink Maybe not With so much bad news in the world we forget how much environmental progress has been made In a narrative that reaches from Native American tribal practices to public health and commercial hunting Wild at Heart shows how western attitudes towards nature have changed dramatically in the last five hundred years The Chinook gave thanks for King Salmon s gifts The Puritans saw Nature as a frightening wilderness full of uncooked meat With the industrial revolution nature was despoiled and simultaneously celebrated as a source of the sublime With little forethought and great greed Americans killed the last passenger pigeon wiped out the old growth forests and dumped so much oil in the rivers that they burst into flame But in the span of a few decades our relationship with nature has evolved to a more sophisticated sense of interdependence that brings us full circle Across the US people are taking individual action planting native species and fighting for projects like dam removal and wolf restoration Cities are embracing nature too Humans can learn from the past and our choices today will determine whether nature survives Like the First Nations all nations must come to deep agreement that nature needs protection This compelling book reveals both how we got here and our own and nature s astonishing ability to mutually regenerate

The State of the System Paul W. Bennett, 2020-09-23 Over the last fifty years Canada s public schools have been absorbed into a modern education system that functions much like Max Weber s infamous iron cage Crying out for democratic school level reform the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions The State of the System explains how public

schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and ills present in the system Paul Bennett proposes a bold plan to re engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada The State of the System issues a clarion call for more responsive engaged and accountable public schools *Costly Fix* Ian Urquhart,2018-01-29 *Costly Fix* examines the post 1995 Alberta tar sands boom detailing how the state inflated the profitability of the tar sands and turned a blind eye to environmental issues It considers the position of First Nations the character and strength of environmental critiques and the difficulties that environmental groups and First Nations have had in establishing a countermovement to market fundamentalism The final chapter discusses how Alberta s new NDP government in its first couple of years has addressed the legacies they have inherited from the previous Progressive Conservative government on climate change royalties and the blight of tailings ponds in the boreal forest Throughout the book Urquhart demonstrates that too many actors have done too little to prevent Alberta s boreal forest from becoming a landscape sacrificed for unsustainable economic growth **A Regional Geography of the United States and Canada** Lisa Benton-Short,John Rennie Short,Chris Mayda,2018-07-25 Now in a thoroughly revised and updated edition this text offers a comprehensive examination of North America s physical and human geography weaving in the key themes of environment and sustainability throughout The authors explore the challenges each region faces such as water shortages climate change increased migration and diversity urbanization and continued economic changes The book also highlights the positive actions that Americans and Canadians are taking to move toward a more sustainable future New features in the second edition include sections on population immigration and diversity and urban trends Each chapter also features a case study that examines a national park representing natural and cultural heritage how the region is coping with climate change how geospatial technologies are applied to environmental challenges iconic images and or cultural festivals urban sustainability best practices and global connections and networks Designed for ease of teaching and learning the book features full color photographs and maps throughout chapter highlights lists of key terms places and major cities for each chapter discussion questions and a glossary **Oil** Gavin Bridge,Philippe Le Billon,2017-06-05 Oil pulses through our daily lives It is the plastic we touch the food we eat and the way we move Oil politics in the twentieth century was about the management of abundance state power and market growth The legacy of this age of plenty includes declining conventional oil reserves volatile prices climate change and enduring poverty in many oil rich countries The politics of oil are now at a turning point and its future will not be like its past In this in depth primer to one of the world s most significant industries

authors Gavin Bridge and Philippe Le Billon take a fresh look at the contemporary political economy of oil. Going beyond simple assertions of peak oil and an oil curse, they point to an industry reordered by global shifts in demand toward Asia, growing reliance on unconventional reserves, international commitments to reduce carbon emissions, a growing campaign for fossil fuel divestment, and violent political struggles in many producer states. As a new geopolitics of oil emerges, the need for effective global oil governance becomes imperative. Highlighting the growing influence of civil society and attentive to the efforts of firms and states to craft new institutions, this fully updated second edition identifies the challenges and opportunities to curtail price volatility, curb demand, and the growth of dirty oil, decarbonize energy systems, and improve governance in oil-producing countries. *The Farmers' Advocate and Home Magazine*, 1908 *Art of Sharing* Mary Janigan, 2020-07-23 In 1957, after a century of scathing debates and threats of provincial separation, Ottawa finally tackled the dangerous fiscal inequalities among its richer and poorer provinces. Equalization grants allowed the poorer provinces to provide relatively equal services for relatively equal levels of taxation. *The Art of Sharing* tells the dramatic history of Canada's efforts to save itself. The introduction of federal equalization grants was controversial, and wealthier provinces such as Alberta, wanting to keep more of their taxpayers' money for their own governments, continue to attack them today. Mary Janigan argues that the elusive ideal of fiscal equity, in spite of dissent from richer provinces, has helped preserve Canada as a united nation. Janigan goes back to Confederation to trace the escalating tensions among the provinces across decades as voters demanded more services to survive in a changing world. She also uncovers the continuing contacts between Canada and Australia as both dominions struggled to placate disgruntled member states and provinces that blamed the very act of federation for their woes. By the mid-twentieth century, trapped between the demands of social activists and Quebec's insistence on its right to run its own social programs, Ottawa adopted non-conditional grants in compromise. The history of equalization in Canada has never been fully explored. Introducing the idealistic Canadians who fought for equity along with their radically different proposals to achieve it, *The Art of Sharing* makes the case that a willingness to share financial resources is the real tie that has bound the federation together into the twenty-first century. *Earth's Landscape* Joyce A.
