

Pythagorean Theorem Word Problems

Solve the following problems using the Pythagorean theorem.

- ① A ladder of 4.5 m length leans against a vertical wall. The foot of the ladder is 1.2 m from the wall as shown in the figure. How far up the wall can the ladder reach?

- ② A kite is attached to a string 150 m long. Daniel holds the end of the string 1 m above the ground and the horizontal distance of Daniel from Prince is 80 m as shown in the diagram. Find the distance of the kite from the ground.

- ③ A horse race starts and finishes at A. The movement of the horses are in the order AB, BC, CA, AE, EC, AND CA. Find AE and AC.

AE = _____ AC = _____

Springboard Pythagorean Theorem Word Problems

Answer

John Andrew Bexell

Springboard Pythagorean Theorem Word Problems Answer:

McGraw-Hill Education: Top 50 ACT Math Skills for a Top Score, Second Edition Brian Leaf, 2016-03-11 Publisher's Note Products purchased from Third Party sellers are not guaranteed by the publisher for quality authenticity or access to any online entitlements included with the product This go to study guide provides the concepts study strategies and practice you need to dramatically raise your ACT scores in English Reading and Science areas of the exam McGraw Hill Top 50 ACT Math Skills for a Top Score second edition presents the heart of each of the 50 most important concepts in this subject area Within each topic exercises help you build critical skills and illustrate how each concept is tested on the ACT Written by a test prep expert with years of experience with the SAT and ACT preparation this easy to use book features A pretest designed to identify your weaknesses in the Math areas ACT traditionally focuses on Two to four page spreads with lessons that increase your knowledge in the 50 essential skills with step by step sample exercises A post test designed to track the progress of each specific skill A full answer key with helpful explanations 2 extra tests online **Top 50 ACT Math Skills, Third Edition** Brian Leaf, 2021-12-10 Proven and practical strategies for success on the Math Skills section of the ACT completely revised and updated for the latest version of the exam There are many comprehensive ACT prep books out there but if you're looking to master specific skills and increase your score Top 50 ACT Math Skills Third Edition offers the most effective study strategy available The first book of its kind to present the heart of each of the 50 most important ACT concepts this essential guide provides exercises that show you exactly how each math concept is tested on the ACT Written by a renowned educational counselor this book was created specifically for visual learners with small bits of information to aid in quick concentrated study Within each topic solved problems of gradually increasing difficulty to help you build your problem solving skills Features 50 essential skills each presented clearly on a two page spread offer quick targeted review the content was created specifically for the visual learner A pre test designed to identify weaknesses in the critical math concepts on the ACT that students often struggle with Visually appealing two to four page spreads with lessons that boost knowledge in the 50 essential skills with step by step sample exercises A post test designed to track your progress in each specific skill A full answer key with helpful explanations 2 extra tests online *Applying Standards-Based Constructivism* Pat Flynn, Paul Vermette, Don Mesibov, 2013-09-27 This book provides teachers with practical ways of constructing lessons that will engage students and help them develop personal responsibility for their own learning State learning standards and related core curricula require students to demonstrate what they know and understand Students cannot learn to demonstrate their understanding if they sit passively The authors call for constructivist practices which recognize the important role played by standards and student accountability and which also acknowledge the practical need for lecture in an appropriate context This book also shows the links between constructivism and differentiated instruction and other approaches to teaching and learning Current Index to Journals in Education ,1979 **Looking for Pythagoras** ,2002 *Looking for*

Pythagoras Glenda Lappan, 1998 *The Pythagorean Theorem* Merle A. Barlow, 2016-02-05 Pythagoras a famous Greek scholar mathematician and philosopher formulated a proof for a theorem that is named for him the Pythagorean theorem This theorem states that in any right triangle the square of the hypotenuse is equal to the sum of the squares of the other two sides The Pythagorean theorem for right angled triangles likely was known long before the time of Pythagoras It was probably used by the ancient Egyptians to construct the pyramids The theorem is quite believable without rigorous proof to anyone willing to expend a modest effort in some experimentation One method is to draw a number of right angled triangles in as wide a variety as practicable and measure all of the sides It will be determined that for each triangle drawn the square of the length of the side opposite the right angle is about equal to the sum of the lengths of the squares of the other two sides Another method requires the availability of a balance For this more interesting experiment construct a right angled triangle and a square on each side using a piece of sheet metal or cardboard Then cut out the three squares and weigh them on the balance The square on the hypotenuse should balance the other two Contained within this book are some rigorous proofs and some interesting perspectives regarding right angles and right angled triangles Doubtless this theorem is one of the most useful concepts in mathematics *Looking for Pythagoras* , 2004 Contains a complete eighth grade mathematics curriculum with connections to other subject areas [Pythagorean Reference Guide](#) Conrad Dowery, 2021-07-10 The book shares a list of Pythagorean numerals These sets of numbers are for teachers or students to find the answer integer sets in the learning process These sets of numbers are all based on the Pythagorean formula *Pythagorean Theorem 90 Success Secrets - 90 Most Asked Questions on Pythagorean Theorem - What You Need to Know* Professor Stephen Prince, 2014-09-28 It s a brand new Pythagorean theorem world There has never been a Pythagorean theorem Guide like this It contains 90 answers much more than you can imagine comprehensive answers and extensive details and references with insights that have never before been offered in print Get the information you need fast This all embracing guide offers a thorough view of key knowledge and detailed insight This Guide introduces what you want to know about Pythagorean theorem A quick look inside of some of the subjects covered Pythagorean triples Growing Up in the Universe Part 1 Waking Up in the Universe Effects of nuclear explosions Summary of the effects Formalism mathematics Right angle Rule of 3 4 5 Pythagoras Life Right triangle Pythagorean theorem Philosophy of mathematics Formalism Triangle inequality Law of cosines Case of an acute angle Geographical distance Flat surface formulae Pythagorean theorem Proof using similar triangles Berlin Papyrus 6619 Scientific Scientific practice Scarecrow Oz The Wizard of Oz History of mathematics Chinese mathematics Tensai Bakabon Characters Th bit ibn Qurra Mathematics Chinese mathematics Song and Yuan mathematics History of geometry The Nine Chapters on the Mathematical Art Zhou Bi Suan Jing Euclidean distance Two dimensions Chinese mathematics Early Chinese mathematics Euclidean metric Theorem Provability and theoremhood Geometry History of geometry Sums of squares Chinese mathematics Mathematics in the period of disunity Proximity Geometry Shape of the Universe FLRW model of the
