Sprint Motorola Photon Manual:

An Inexpensive Circuit for Computer Controlled Phototube Gain Sabrina Spangler,1984 *Photon* ,1988

Photon 713 technical manual Photon Inc, **PHOTON** ,1988 PHOTON has proven very useful in the development of the X17 superconducting wiggler beamline Its use has determined the shielding required from the wiggler device to the very end of the beamline in the hutches and angiography section Doses calculated by this program have been compared with experimental results from conventional bending magnet beamline with great success In each case the program consistently overestimated the dose by factors ranging from 2 to 10 The reason for this overestimation is understood and was not refined further in the program in order to maintain some level of safety in the shielding calculations PHOTON should prove useful in the design of any beamline Its ability to calculate power deposited and spectra transmitted through nearly arbitrary beamline configurations as well as the scattered radiation doses through shielding walls make it a very powerful tool
