Split Decision The Hybrid Series Book 1:

Split Decisions Janet Halley, 2008-04-01 Is it time to take a break from feminism In this pathbreaking book Janet Halley reassesses the place of feminism in the law and politics of sexuality She argues that sexuality involves deeply contested and clashing realities and interests and that feminism helps us understand only some of them To see crucial dimensions of sexuality that feminism does not reveal the interests of gays and lesbians to be sure but also those of men and of constituencies and values beyond the realm of sex and gender we might need to take a break from feminism Halley also invites feminism to abandon its uncritical relationship to its own power Feminists are in many areas of social and political life partners in governance To govern responsibly even on behalf of women Halley urges feminists should try taking a break from their own presuppositions Halley offers a genealogy of various feminisms and of gay queer and trans theories as they split from each other in the United States during the 1980s and 1990s All these incommensurate theories she argues enrich thinking on the left not despite their break from each other but because of it She concludes by examining legal cases to show how taking a break from feminism can change your very perceptions of what is at stake in a decision and liberate you to decide it anew

The Dark Reflections Series: Books 1-3 Dean Murray, 2015-03-03 As the heir to the largest shape shifter pack in North America Alec Graves has inherited a savage dangerous life If he can successfully take over his father's pack Alec will finally have a chance to make changes for the better but he wouldn't be the first person to be corrupted by that kind of power Human teenager Adri Paige is only days away from manifesting a supernatural ability that is as powerful as it is terrifying Her only hope of survival lies in mastering her gift before it lures dark forces into her life Separately Alec and Adri have no chance of seeing another year Together they just might be able to save the world This omnibus edition includes the first three novels in the popular Dark Reflections Series which has received more than 300 4 5 star reviews and is nearly 800 pages of action danger and romance set in one of the richest most complex worlds in the genre This Bundle includes Bound The only thing worse than having no family at all is having a family that is out to hurt you That would all be bad enough for a normal 17 year old but it's even worse for Alec Graves A shape shifter's pack his family is the only thing stopping the other preternatural creatures out there from killing them Alec's pack isn't just neglectful he's pretty sure that his father wants him dead Alec is about to be sent to the front lines of a war between his people and everything else that goes bump in the night His only chance of survival is to convince everyone around him that he's the perfect soldier but there are lines that Alec won't cross not for any price Hunted The Perfect Weapon Adri Paige can visit people inside of their dreams where they are defenseless The Ultimate Spy Adri's power lets her ferret out anyone's secrets and even influence their waking actions The World's Biggest Prize Adri's power comes with a price Dark forces hunt her hoping to bend her gifts to their purposes The Real Problem Adri needs to make it through high school without letting anyone around her figure out her true capabilities all while crushing on a guy she knows is probably trouble Ambushed Adriana Paige has survived not one but

two vampire attacks in less than twenty four hours and unless she's able to master her ability to share other people's dreams the attacks are only going to get worse Taggart has promised to train Adri but he's got even more enemies than she does and there's no guarantee that he'll be able to keep her from being caught in the crossfire More than anything else Adri wants to talk to shape shifter Alec Graves but he's gone strangely silent There's no way for Adri to know if that's because he's no longer interested in her or if it's simply because he's still on the run from his ruthless father Kaleb As enemies both new and old start closing in on Adri she's starting to worry that she might be forced into choosing between Taggart the man who saved her life and Alec the guy to whom she feels inexplicably connected

Publisher's Note Dean Murray's ongoing Reflection Series has been a stunning success with more than half a million copies in circulation and a rich complex world where choices right or wrong have real profound consequences Unsatisfied with the restrictions imposed on him by writing inside of the conventional series structure Dean has returned to Sanctuary and the characters so many fans have fallen in love with The Dark Reflections Series is an alternate timeline set in the same world and featuring many of the same characters as the Reflections Series but with a profoundly different backstory

Stream Data Mining: Algorithms and Their Probabilistic Properties Leszek Rutkowski, Maciej Jaworski, Piotr Duda, 2019-03-16 This book presents a unique approach to stream data mining Unlike the vast majority of previous approaches which are largely based on heuristics it highlights methods and algorithms that are mathematically justified First it describes how to adapt static decision trees to accommodate data streams in this regard new splitting criteria are developed to guarantee that they are asymptotically equivalent to the classical batch tree Moreover new decision trees are designed leading to the original concept of hybrid trees In turn nonparametric techniques based on Parzen kernels and orthogonal series are employed to address concept drift in the problem of non stationary regressions and classification in a time varying environment Lastly an extremely challenging problem that involves designing ensembles and automatically choosing their sizes is described and solved Given its scope the book is intended for a professional audience of researchers and practitioners who deal with stream data e.g. in

telecommunication banking and sensor networks

Power Sharing in a Divided Nation Johan Saravanamuttu,2017-03-09 This book argues that Malaysia s electoral politics have historically been premised on a hybridized model of communalism and consociationalism Beyond this it posits a newer idea of power sharing based on the dynamic and transformative practice of mediated communalism through six decades 1952 2016 of electoral politics The strategy of mediating communalism is critically explored throughout the book serving to test its

saliency as a distinct approach to power sharing in a social formation which is ethnically religiously and regionally divided yet has remained remarkably and tenuously integrated throughout Malaysia's electoral history The book delves into this question by narrating and theorizing the complexity of communal politics leading to the emergence of new politics which have attempted to put Malaysia on the track of further democratization It is further implied that new politics has to work in tandem with mediated communalism to transcend the most deleterious effects of an ethnically divided society **Applied Mechanics Reviews** ,1986 Intelligent System and Computing Yang Yi,2020-04-29 The book Intelligent System and Computing reports the theory mathematical models algorithms design methods and applications of intelligent systems and computing It covers various disciplines including computer and information science electrical and computer engineering natural sciences economics and neuroscience The broad ranging discussion covers the key disciplines in computational science and artificial intelligence as well as advances in neuromorphic computing deep learning the Internet of Things computer vision and many others This volume provides both academics and professionals with a comprehensive overview of the field and presents areas for future research The Cambridge Handbook of Competition Law Sanctions Tihamer Tóth,2022-06-23 This handbook brings together an international roster of competition law scholars and practitioners to address the issue of sanctions in competition law from all angles Covering nineteen jurisdictions around the world the book analyzes the theoretical foundations and practice of sanctioning competition law infringements and most importantly cartels Contributors include a range of experts drawing on criminal law company law labor law human rights and law and economics to determine what sanctions are available as a matter of positive law against corporations and individuals including fines and other criminal administrative and civil law sanctions whether law enforcers are using these sanctions effectively and if new sanctions including individual sanctions should be introduced *Differential Equations - Theory, Modeling, Data Assimilation and Algorithms* Don Kulasiri,2025-10-01 Rooted in years of interdisciplinary research and collaboration the chapters in this book highlight the central role of differential equations in describing how systems evolve across science and engineering while emphasizing the modern need to connect theory with data and computation It bridges rigorous mathematical foundations with the practical challenges of modeling and inference demonstrating how data assimilation refines models using observations and how advanced numerical algorithms enable the study of complex systems beyond analytical reach By addressing the interplay between models data and computation the book equips advanced students researchers and practitioners with the understanding and tools needed to apply differential equations meaningfully in contemporary scientific inquiry
