McGrail,2017-01-10 How do students become successful writers and excited about writing Blogging or other online writing

in your classroom can build literacies in all content areas by giving students the frequent writing practice that is missing in classrooms today. Students have to write to get better at writing. They need to write to an authentic audience, real people who are interested in what they have to say and are willing to comment back and engage in further conversation. Simply put, they need practice time in interactive writing. How might teachers do this? This book is the answer to this question. The book investigates blogs as digital spaces where students can practice writing and converse with an authentic audience. It focuses on idea development and gives students voice. Today's students already occupy or will inhabit new online spaces in the future. Schools and teachers must move forward with the students and embrace this world across the curriculum in purposeful and creative ways. This will transform schools and teacher classrooms. This book provides K-12 educators with key information about some of the most effective teaching and learning tools available today in one convenient publication. Each of the innovations has a long history of use and has been researched and evaluated in a variety of settings. Giselle Martin-Kniep chose these specific innovations because as a whole they foster a student-centered classroom environment that is both equitable and rigorous. In separate chapters for each topic, she addresses: 1. essential questions, 2. curriculum integration, 3. standards-based curriculum and assessment design, 4. authentic assessment, 5. scoring rubrics, 6. portfolios, 7. reflection, and 8. action research. Annotated lists of recommended resources provide suggestions for further exploration of each topic. Readers new to these topics will gain a basic understanding of each and learn how to use them to create a student-centered classroom. More experienced educators can also benefit from reexamining these innovations and considering them as parts of a comprehensive whole. Numerous examples from all grade levels, along with design modules, templates, and checklists, make this an invaluable guide for teachers and administrators. Note: This product listing is for the Adobe Acrobat PDF version of the book. Applied Mechanics Reviews, 1991. *The Math Pact, High School* Barbara J. Dougherty, Sarah B. Bush, Karen S. Karp, 2020-09-19. A schoolwide solution for students' mathematics success. Do you sometimes start to teach a

mathematics concept and feel like you're staring at a sea of bewildered faces. What happens when you discover students previously learned a calculation trick or a mnemonic that has muddled their long-term understanding? When rules seem to change from year to year, teacher to teacher, or school to school, mathematics can seem like a disconnected mystery for students. Clear up the confusion with a Mathematics Whole School Agreement. Expanded from the highly popular Rules that Expire series of NCTM articles, this essential guide leads educators through the collaborative step-by-step process of establishing a coherent and consistent learner-centered and equitable approach to mathematics instruction. Through this work, you will identify streamline and become passionate about using clear and consistent mathematical language, notations, representations, rules, and generalizations within and across classrooms and grades. Importantly, you'll learn to avoid rules that expire, tricks that may seem to help students in one grade but hurt in the long run. Features of this book include: Abundant grade-specific examples, Effective working plans for sustainability, Barrier-busting tips to do and try out, Practical templates and checklists, PLC prompts and discussion points. When teachers unite across grades, students hit the ground running every year. Take the next step together as a team and help all your students build on existing understanding to find new success and most importantly, love learning and doing mathematics. [Jennings' Little Hut](#) Anthony Buckeridge, 2001-08-05 The woodlands at Linbury Court become squatters' territory when Jennings comes up with the idea of building huts out of reeds and branches. But things can only go horribly wrong for Jennings when he is put in charge of Elmer, the treasured goldfish, and even worse when the Headmaster pays the squatters a visit.
