Write This Way from the Start Kelly Boswell, 2017-09-29 As teachers the beginning of each school year presents us with fresh starts and opportunities How will we build community and create a culture that values thinking learning and risk taking How can we create a safe environment where all learners feel welcome and valued As writing teachers it is of utmost importance that we launch our students into the world of writing in a way that engages them and helps to build their confidence In this book Kelly Boswell shares a variety of ways to kick start the school year and invite students to engage in meaningful purposeful and joyful writing experiences *The Teacher-Writer* Christine M. Dawson, 2016-12-12 The Teacher Writer shows how teachers can pursue and sustain personally and professionally worthwhile writing practices even amidst the many demands associated with teaching It meets teachers wherever they are as novice teachers just beginning to pursue writing as teachers emerging from a professional development experience or as accomplished writers seeking to further their craft Chapter by chapter the book provides strategies to help teachers get started on projects build energy for writing overcome obstacles of limited time create support systems using online technologies and develop coherence across their writing lives The text includes useful writing group routines questions for framing collaborative inquiry methods for adapting writing communities to online settings and rich examples of conversations and texts shared in actual teacher writing group meetings Book Features Focuses on teacher writers and their actual experiences working together in a writing group including benefits and challenges Includes vignettes taken from writing group meetings that demonstrate the variety of ways teachers may participate and engage in writing Offers practical suggestions for teachers seeking to form writing groups including plans for online groups Shares strategies to help teacher writers expand their concepts of writing to include everything from exploratory texts to professional and academic writing An extremely important read for every teacher of writing this book focuses on the development of ideas and the exploration of language and structure instead of formulaic routines Here we see how teachers can locate or reawaken themselves as writers bringing fresh language literacy excitement and expertise into their classrooms Judith A Langer distinguished research professor University at Albany Readers of Christine Dawson's new book might be surprised to find themselves in a novelistic world where the literary characters are women who through talk and writing act in and on their complex lives They are teachers yes but they are also thoughtful mothers and daughters wives and friends and ready companions This is a newly liberated notion of a writing group of women who teach and a practical guide to those readers inspired to start their own group Anne Haas Dyson University of Illinois at Urbana Champaign **Beyond the Five Paragraph Essay** Kimberly Campbell, Kristi Latimer, 2023-10-10 Love it or hate it the five paragraph essay is perhaps the most frequently taught form of writing in classrooms of yesterday and today But have you ever actually seen five paragraph essays outside of school walls Have you ever found it in business writing journalism nonfiction or any other genres that exist in the real world Kimberly Hill Campbell and Kristi Latimer reviewed the research

on the effectiveness of the form as a teaching tool and discovered that the research does not support the five paragraph formula In fact research shows that the formula restricts creativity emphasizes structure rather than content does not improve standardized test scores inadequately prepares students for college writing and results in vapid writing In Beyond the Five Paragraph Essay Kimberly and Kristi show you how to reclaim the literary essay and create a program that encourages thoughtful writing in response to literature They provide numerous strategies that stimulate student thinking value unique insight and encourage lively personal writing including the following Close reading which is the basis for writing about literature Low stakes writing options that support students thinking as they read Collaboration in support of discussion debate and organizational structures that support writing as exploration A focus on students writing process as foundational to content development and structure The use of model texts to write in the form of the literature students are reading and analyzing The goal of reading and writing about literature is to push and challenge our students thinking We want students to know that their writing can convey something important a unique view to share defend prove delight discover and inspire If we want our students to be more engaged skilled writers we need to move beyond the five paragraph essay
