Power System Load Frequency Control Hassan A. Yousef, 2017-03-16 This title presents a balanced blend between classical and intelligent load frequency control techniques which is determinant for continuous supply of power loads The classical control techniques introduced in this book include PID pole placement observer based state feedback static and dynamic output feedback controllers while the intelligent control techniques explained here are of adaptive fuzzy control types This book will analyze and design different decentralized LF controllers in order to maintain the frequency deviations of each power area within the limits and keep the tie line power flow between different power areas at the scheduled levels

Robotics, Automation and Control Pavla Pecherková, Miroslav Flidr, Jindřich

Duník,2008-10-01 This book was conceived as a gathering place of new ideas from academia industry research and practice in the fields of robotics automation and control The aim of the book was to point out interactions among various fields of interests in spite of diversity and narrow specializations which prevail in the current research The common denominator of all included chapters appears to be a synergy of various specializations This synergy yields deeper understanding of the treated problems Each new approach applied to a particular problem can enrich and inspire improvements of already established approaches to the problem

Classical Control System Kunal Chakraborty,2016-04-15 The Temperature measurement of liquid in a tank can be controlled by classical and advance control algorithms applying PID FUZZY LOGIC SFB LQR Here we consider a three tank noninteracting system We observed that tank1 affects the dynamic behavior of tank2 Similarly tank2 affects the dynamic behavior of tank3 and vice versa because the flow rate F1 depends on the difference between liquid levels h1and h2 Thus a change in the inlet flowrate affects the liquid level in the tank which in turn affects the temperature of the liquid Basically it is a thermal process Various types of temperature sensors include RTD T C and Thermistor In this particular project the author used a mercury thermometer as sensor Mathematical models of the three tank method give a third order equation Each tank gives a transfer function of the first order system They make it easy to check whether a particular algorithm is giving the requisite results A lot of work has been carried out on the temperature control in terms of its stabilization Many attempts have been made to control the response of temperature measuring systems
