Explorations in Ecocriticism Paul Lindholdt, 2015-04-09 A chief innovation of *Explorations in Ecocriticism* is to push ecological criticism beyond its focus on literary studies to engage with other arts and culture One chapter closely examines the pictures commissioned by the U S Bureau of Reclamation to valorize its big dam projects Previously no one has written about the large art collection that toured the nation under the auspices of the Smithsonian in the early 1970s when the Bureau of Reclamation was under fire and new environmental regulations were becoming law Another chapter An Iconography of Sabotage previously published in France as part of a Paris symposium looks at the pictorial dimension of saboteurs throughout American history with a special emphasis on the IWW and Earth First The book draws extensively on the social sciences Ecology and environment are treated too often as technical topics that go over the heads of lay readers Many Americans care about air and water quality the extinction of species and the unfortunate politicization of science But they also find the discourse daunting the details exceedingly complex By leavening

such heavy subjects with current events Explorations in Ecocriticism makes environmental issues accessible to lay readers and offers routes to sustainability in the United States today

The Jazz Loft Project Sam Stephenson, 2023-06-27 Reissue of an acclaimed collection of images from photographer W Eugene Smith's time in a New York City loft among jazz musicians In 1957 Eugene Smith walked away from his longtime job at Life and the home he shared with his wife and four children to move into a dilapidated five story loft building at 821 Sixth Avenue in New York City's wholesale flower district The loft was the late night haunt of musicians including some of the biggest names in jazz Charles Mingus Zoot Sims Bill Evans and Thelonious Monk among them Here from 1957 to 1965 he made nearly 40 000 photographs and approximately 4 000 hours of recordings of musicians Smith found solace in the chaotic somnambulistic world of the loft and its artists and he turned his documentary impulses away from work on his major Pittsburg photo essay and toward his new surroundings Smith's Jazz Loft Project has been legendary in the worlds of art photography and music for more than forty years but until the publication of this book no one had seen his extraordinary photographs or read any of the firsthand accounts of those who were there and lived to tell the tales

fiercely reptilian Soro from the bureaucratic Hoon to the manipulative Thennanin their physiology psychology history their clans and alliances and their shifting attitudes toward Earth and its representatives Here too is a history of Earth's contact and challenging interactions with the mysterious and powerful Civilization of Five Galaxies a look at its institutions languages and customs plus a time line of momentous events going back 3 billion years For the millions of fans of the Uplift novels this long awaited guide will be an essential reference work filled with vital information and never before seen illustrations that reveal for the first time in one volume the keys to the ambitious vision and bold speculation of the Uplift universe *Dark Fairies* Dr. Bob Curran, 2010-07-20 We all know about fairies they're usually helpful ethereal creatures in children's stories and Walt Disney films flitting about doing good right Wrong In ancient times the concept of fairies was rather different They were the often dangerous embodiment of the land dark and unpredictable spirits that watched Humanity with a jaundiced and hostile eye And according to conventional folk wisdom they were to be feared rather than trusted Indeed in their original form many of our fairy tales read more like late night horror stories Dr Bob Curran investigates the folkloric roots of the fairy kind tracing their origins from the sprites and maenads of Classical times to the sanitized versions of the English Victorians Among other aspects he examines the connections in the Christian mind between the fairy kind and demons the links between fairies and ancient pagan gods and the often strained relations between fairies and humans across the ages This is not a book for those who believe that fairies are friendly kindly creatures With the growing and anticipated interest in fairies particularly given the forthcoming Disney film *Wings* starring Miley Cyrus *Dark Fairies* is a timely and valuable new title

Operation KE Dennis R Letourneau, J. A. R Letourneau, 2012-11-15 Operation KE explores the air combat that attended the Japanese evacuation of Guadalcanal in early 1943 a topic which has hitherto received very little attention Operation KE was successful largely because Japanese strategic planning and tactical execution was basically sound The traditional view holds that the Japanese got away with the initiative largely because the Americans let them the US Pacific high command felt it was not worth the effort to try and stop them Letourneau contends that this was not entirely the case He argues that the Cactus Air Force and Guadalcanal based naval units did their best to disrupt the evacuation still believing that the Tokyo Express was bringing reinforcements and supplies to the 17th Army Other US forces in the South Pacific did make a half hearted and questionably executed attempt to stop the Japanese but were bluffed into adopting a wait and see posture Operation KE focuses on the air war fought between the Cactus and US 13th Air Forces on the one hand and the Japanese Navy and Army Air Forces on the other from mid December 1942 to mid February 1943 The book scrutinizes the US air strikes against the six KE related Tokyo Express destroyer runs plus related air strikes against the Japanese merchant marine as well as air and naval base suppression missions undertaken by both sides to determine what actually happened in order to analyze why the Japanese evacuation succeeded and why Cactus failed to stop it Background chapters attempt to assess the respective states of readiness of the Japanese and US air arms in the South Pacific to support on the one hand and counter on

the other the execution of Operation KE The central portion of the book narrates in some detail what actually occurred in the air and at sea including air strikes fighter sweeps base suppression missions and naval sorties during the crucial prelude to and the actual playing out of the interrelated events that comprised the evacuation operation Concluding chapters analyze on both strategic and tactical levels the Japanese planning and execution of Operation KE and Cactus initiatives to interdict KE's successful prosecution The authors conclude that both the Japanese and the American states of readiness on the eve of Operation KE suffered in such matters as optimizing both resources and operating procedures and combating a hostile environment Consequently both combatants were somewhat handicapped in their abilities respectively to carry out and contest Operation KE The author contends that the Japanese developed a reasonably sound strategy that exploited those methods and tools of war then in use in the South Pacific to achieve success they maximized their own strengths while taking advantage of their adversary's limitations Contrary to the traditional view the authors are of the opinion that Japanese utilization of their newly built airstrip at Munda in the Central Solomons played an important role in the success of Operation KE which was in keeping with the long range intention of developing Munda and Vila airstrips as major forward airbases to defend against any Allied push toward Rabaul through the Solomons The U S on the other hand by consistently misreading Japanese intent regarding Operation KE and pursuing a cautious offensive strategy blunted the tactical impact of their initiatives to counter the evacuation Several imprudent tactical decisions and a misallocation of resources further diluted the strength of US efforts

From Africa to the Heart of the GOP David O. Agbeti, 2005 This book is a true account of the events on a long ago night when two angels from heaven visited me It is the story of that angelic encounter as I experienced it It happened many years ago but the impressions are still vivid in my memory It was not a fleeting glimpse of ethereal beings clothed in cloudy mist Those angels were real If seen from a distance they probably would have seemed like ordinary men Close up however no one could have mistaken them for men Anyone would have known they were angels who had come down from heaven During their first appearance it seemed to me their speech to me lasted a long time In retrospect that time period probably could have been measured in minutes That is true even though they seemed like very long minutes They were silent during their brief second appearance albeit puzzled and inquisitive These angels had about them a mysterious air of another world They stood in front of my chair in my living room with an indescribable and lofty majesty Their posture and demeanor spoke of another sphere of existence A sphere about which writers have speculated for thousands of years They somehow reeked of an indescribable physical and mental power that was beyond my comprehension My initial reaction was fright A fright so great it overwhelmed my senses I thought they had come to kill me That was a certainty in my numbed mind That fear quickly became life threatening I did not know it at the time but their actions and speech would be forever impressed on my memory During their first visit they were extremely anxious to reassure me They did not wish me to fear them Their speech was sympathetic and reassuring They told me they had not come to injure me in any way They then

explained the reason for their intrusion into my presence Nothing that I have found anywhere in literature except perhaps the bible tells a similar story My personality underwent a complete change that night The brief account of that experience is now told for the first time in the 40 years since that encounter **Is God Necessary? No! and Yes!** Herbert F. Vetter, 2007-09-01 Today there is a new movement critical of religion the new atheism fostered by Daniel Dennett Richard Dawkins and Sam Harris Harris says faith in god or gods is the most dangerous element of modern life citing Islamic terrorism as well as Judeo Christianity's growing weapons of mass destruction Dawkins says the biblical Yahweh is psychotic and religion is not only nonsense but a divisive and oppressive force Dennett describes the God Delusion and hopes that practitioners of religion will shrink its maleficent role in civilization The question addressed in this book Is God Necessary is not new but is of perennial importance What is new is that a great new discovery answers this question decisively in the twenty first century as Darwin's theory of evolution did in the nineteenth century **Cockpit Confessions of an Airline Pilot** Stephen G. Keshner, 2001-04 **Natural Hazards, Second Edition** Burrell E. Montz, Graham A. Tobin, Ronald R. Hagelman, 2017-04-25 Revised edition of Natural hazards explanation and integration Graham A Tobin and Burrell E Montz c1997 **Wyandotte. The monikins. Jack Tier** James Fenimore Cooper, 1891 **Geography of Time, Place, Movement and Networks, Volume 2** Stanley D. Brunn, 2024-05-23 This book explores journeys in a time context with a focus on places place meanings and landscapes Whether the journey relates to ancient or modern trails roads or railroads or a historical or contemporary pilgrimage or a tourist venture in social contexts the book addresses the importance of places and environmental settings whereby time itself is described and defined in multiple contexts The chapters discuss among others archaeological and pre history settings tourism settings and heritage events as well as regional and transnational migration routes and those used by historical nomadic cultures and postmodern nomads Some time and place journeys are fluid and dynamic and re interpreted while for others there is much sameness in the visible landscapes Retaining the past and reconstructing the past are both journeys That sameness concept is also applied to cultural and political worlds where there is little progress or reform to address social welfare and empowerment This book opens the door for exploring shallow and deep journeys by those in the humanities and social sciences at local national and regional scales **Developing Readers in the Academic Disciplines** Doug Buehl, 2017 Being literate in an academic discipline means more than simply being able to read and comprehend text it means you can think speak and write as a historian scientist mathematician or artist Doug Buehl strips away the one size fits all approach to content area literacy and presents a much needed instructional model for disciplinary literacy showing how to mentor middle and high school learners to become academic insiders who are college and career ready This thoroughly revised second edition of Developing Readers in the Academic Disciplines shows how to help students adjust their thinking to comprehend a range of complex texts that fall outside their reading comfort zones This book a natural companion to Buehl's Classroom Strategies for Interactive Learning which has been bolstering

student comprehension for almost three decades provides the following supports for teachers Instructional tools that adapt generic literacy practices to discipline specific variations Strategies for frontloading instruction to activate and build background knowledge New approaches for encouraging inquiry around disciplinary texts In depth exploration of the role of argumentation in informational text Numerous examples from science mathematics history and social studies English language arts and related arts to show you what vibrant learning looks like in various classroom settings Developing Readers in the Academic Disciplines introduces teachers from all disciplines to new kinds of thinking and ultimately teaching that helps students achieve new levels of understanding
