[The Impact of Sensory, Linguistic and Social Deprivation on Cognition](#) Matthew Dye,Olivier Pascalis,2017-12-21 Early experience plays a crucial role in determining the trajectory of cognitive development For example early sensory deprivation is known to induce neural reorganization by way of adaptation to the altered sensory experience Neville and Bavelier s compensatory theory hypothesizes that loss of one sense may bring about a sensory enhancement in the remaining modalities Sensory deprivation will however also impact the age of emergence or the speed of acquisition of cognitive abilities that depend upon sensory inputs Understanding how a child s early environment shapes their cognition is not only of theoretical interest It is essential for the development of early intervention programs that address not just the early deprivation itself but also the cognitive sequelae of such deprivation The articles in this e book all address different aspects of deprivation sensory linguistic and social and explore the impacts of such deprivation on a wide range of cognitive outcomes In reading these contributions it is important to note that sensory linguistic and social deprivation are not independent factors in human experience For example a child born deaf into a hearing family is likely to experience delays in exposure to natural language with subsequent limits on their linguistic competence having an effect on social interactions and inclusion a child raised in environments where social interaction is highly limited is also likely to experience reductions in the quantity and quality of linguistic inputs Future work will need to carefully examine the complex interactions between the sensory linguistic and social environments of children raised in atypical or impoverished environments

Race-Conscious Caring in Educational Leadership Michael G. Gunzenhauser,Osly J. Flores,Michael W. Quigley, This book describes a model for educational leadership ethics that provides a critical reflective vision of what education can be for all children in K 12 schools The authors of Race Conscious Caring in Educational Leadership conducted interviews with 22 school leaders who shared their visions toward serving students of color The resulting model is built around the four features demonstrated by the strongest leaders race consciousness critical caring justice leadership and ethical praxis Race conscious caring leaders go beyond their good intentions to develop deep understanding of the needs and interests of their students they learn about racial identities and histories as strengths and sources of learning and they provide opportunities for educational experiences that are routinely denied to marginalized and minoritized students This book provides numerous examples of race conscious caring leaders with key analysis of where leaders fall short It is designed to help future and current leaders to critically reflect on their own experiences challenging them to build their capacity for transformative change Book Features Provides instructors with a unique text that integrates equity leadership and professional ethics Describes a comprehensive model that challenges leaders to improve across multiple dimensions especially if they are strong in some areas and not as strong in others Presents the ideal for each part of the model along with examples of partial fulfillment and what it looks like when a leader evidences very few of the ideals Incorporates examples and excerpts from school leaders who demonstrate varied levels of engagement with the model to help readers see themselves in the various categories Addresses the challenges today s leaders are facing due to policies and political climates working to pull back on equity work

Genetics Manual: Current Theory, Concepts, Terms George P Redei,1998-03-31 The 1 150 pages contain more information than any other comparable book It is not a glossary or dictionary or review because all concepts are explained not just defined or mentioned Covers the latest developments usually missed in textbooks and monographs The broad range of modern genetics of cell and molecular biology biometry etc are included without glossing over the classical foundations The hundreds of simple and clear illustrations are very useful for classroom purposes because they can be drawn on the blackboard or projected on a screen without taking much time to make the crucial points The cross references among the entries tie the contents into an extremely useful comprehensive textbook The concise style leads the reader to the point without verbiage The etymology of the terms is explained The text is not intimidating and it is very easy to read because all

the terms are explained within the book Most of the biometrical procedures are presented by worked out examples in a plain form rarely or not found at all in other books It effectively reaches out to non geneticists without compromising high scientific standards Usually the most essential features of a concept are presented at the beginning of the entry and the reader can go as far as she he feels needed about the logic The WEB and e mail addresses of databases and other sources of detailed information are very helpful A well selected list of about 1000 references published mainly in the last couple of years completes the volume The moderate price makes it a best buy and an excellent choice to own for students teachers scientists physicians lawyers and all educated persons who cannot afford an entire library yet wish to be well informed **Hospitality**
