The volumes in the Mapping Tonal Harmony collection have been envisioned as auxiliary material in the study of Tonal Harmony. The main objective of these books is to provide the student teachers, composers, and/or songwriters with a tool that will aid them in hearing, analyzing, foreseeing, and composing harmonic progressions without struggle in all keys alike. These workbooks are based on the map used in the Mapping Tonal Harmony Pro app by mDecks Music, which is recommended as accompanying material for all volumes. All maps, progression examples, and exercises in these books were designed to improve and expand the student's view of the harmonic surroundings around each and every tonal center. The volumes in this collection are organized in a progressive manner, each volume expanding the previous volume's map by introducing new harmonic concepts and/or functions based on the premise that all functions introduced in earlier volumes have been understood and assimilated. Each new concept or function adds some level of detail to the map and/or extends the known area around the tonic. Many of the concepts presented in these books are simply mentioned for mapping purposes only and should be carefully studied by using other sources such as a harmony course, tonal harmony books, teachers, etc. Voice leading and inversions are not covered in these volumes since their main objective is to map essential harmonic functions in every key.
