Finn, Jr., Andrew E. Scanlan, 2021-05-11 More than three million high school students take five million Advanced Placement exams each May yet remarkably little is known about how this sixty year old privately run program has become one of U S education's greatest successes From its mid century origin as a tiny option for privileged kids from posh schools AP has also emerged as a booster rocket into college for hundreds of thousands of disadvantaged youngsters It challenges smart kids affects school ratings affords rewarding classroom challenges to great teachers tunes up entire schools and draws vast support from philanthropists education reformers and policymakers AP stands as America's foremost source of college level academics for high school pupils Praised for its rigor and integrity more than 22 000 schools now offer some or many of its thirty eight subjects from Latin to calculus art to computer science But challenges abound today as AP faces stiffening competition

especially dual credit curriculum wars charges of elitism misgivings by elite schools and universities and the arduous work of infusing rigor into schools that lack it and academic success into young people unaccustomed to it In today s polarized climate can Advanced Placement maintain its lofty standards and overcome the hostility politics and despair that have sunk so many other bold education ventures Advanced Placement The Unsung Success Story of American Education is a unique account richly documented and thoroughly readable of the AP program in all its strengths and travails written by two of America s most respected education analysts *Infancy to IC* Theophilus Huang,2025-08-04 Congratulations to us we are now parents Just like many others before us we scour the Internet and bookshops hoping to find a guide that can tell us how to be good parents Well at the very least we should avoid messing up our parental duties There is a problem we are based in Singapore While this is a great place to live and work it s quite a different story for the kids Singapore has been consistently ranked among the top countries in the world by the OECD s Program for International Student Assessment PISA for some time If parenting is difficult enough as it is imagine doing it in a country with the smartest kids in the world which is what PISA is telling us This book describes our journey as parents in Singapore from infancy to pre school to the Gifted Education Program to Raffles Institution to getting offers from top universities Imperial College University College NUS College Nanyang Technological University Waseda University among others It is my hope that this journey will provide a guideline to other parents so that they can do the same or better
