Candid feedback from 130,000 students. RANKING LISTS, RATINGS, SCORES. Lists of the top 20 colleges in 62 categories based on students' opinions of professors, career services, financial aid, dorms, and much more. Ratings for every school on Financial Aid, Selectivity, and Quality of Life. Bonus list of the 150 Best Value Colleges. DETAILED ADMISSIONS INFORMATION. The Inside Word on competitive applications, Tuition, graduation rates, and average indebtedness. Written for any student or parent mystified by the confusing college admissions process. The Best 379 Colleges provides the facts and information needed to make a smart decision about which of the country's best schools to consider. What the media is saying about The Best 379 Colleges from The Princeton Review. The offbeat indexes, along with the chattily written descriptions of each school, provide a colorful picture of each campus. The New York Times. The most efficient of the college guidebooks. Has entertaining profiles larded with quotes from students. Rolling Stone. A great book; it's a bargain. CNN. Our favorite college guidebook. Seventeen. Provides the kind of feedback students would get from other students in a campus visit. USA Today. *Comparative Guide to Science and Engineering Programs* James Cass, Max Birnbaum, 1971. A key focus is to examine how humanitarian intervention is legitimate in present diplomatic dialogues. In exploring how far there has been a change of norm in the society of states in the 1990s, the book defends the broad-based constructivist claim that state actions will be constrained if they cannot be legitimated and that new norms enable new practices but do not determine these. The book concludes by considering how far contemporary practices of humanitarian intervention support a new solidarism and how far this resolves the traditional conflict between order and justice in international society. **BOOK JACKET** **The Study of Change** James Reardon-Anderson, 1991. When Western missionaries introduced modern chemistry to China in the 1860s, they called this discipline hua hsueh, literally the study of change. In this first full-length work on science in modern China, James Reardon-Anderson describes the introduction and development of chemistry in China in the late nineteenth and early twentieth centuries and examines the impact of the science on language, reform, education, industry, research, culture, society, and politics. Throughout the book, Professor Reardon-Anderson sets the advance of chemistry in the broader context of the

development of science in China and the social and political changes of this era His thesis is that science fared well at times when a balance was struck between political authority and free social development Based on Chinese and English sources the narrative moves from detailed descriptions of particular chemical processes and innovations to more general discussions of intellectual and social history and provides a fascinating account of an important episode in the intellectual history of modern China Columbia Alumni News ,1922 **Hispanic Engineer & IT** ,2008 Hispanic Engineer Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans *US Black Engineer & IT* ,2007-07 **US Black Engineer & IT** ,2007-07 **College of Engineering** University of Michigan.
