 and indeed you can look up any recipe and make it just like a cookbook this is also far more than a simple collection of
 recipes This book will essentially provide you with a solid toolbelt from which you can formulate your own recipes without
 having a degree in science dermatology or cosmetology Each recipe is written for an average skin hair type but with a little
 perusing of the ingredients you will quickly learn what you should plug into the recipes to make the products work for you
 Many recipes include prompts that will give you clear directions to reformulate according to your skin type The first part
 introduces a variety of ingredients and is easy to reference These ingredients have been summarized for convenience if you
 choose to really get into skin care later you'll find that the scientific information available on each is incredible but
 unfortunately I can't cover all that here That would be an entirely different and very large book so I leave that part up to you
 Once we review the ingredients you will find recipes starting with your hair and ending at your toenails literally head to toe
 And once you've picked a few recipes to make at home that you enjoy you can come back to check out how to package them
 to gift to others Let's get started *Natural Soapmaking* Marie Browning, 1999 Provides recipes for making soaps bath salts
