20. In a *bus topology*, no station is in the path of the signal. Unplugging a station has no effect on the operation of the rest of the network.

The special topic chosen for eHealth2017 is Digital Insight Information Driven Health Care and the conference addressed the increasingly international focus of eHealth and the importance of cross border health ICT. The papers presented here cover many eHealth topics from maternity records to rehabilitation and from staff training to information exchange. Future ICT systems will inevitably involve machine learning and predictive analytics in order to provide actionable information to health professionals and support preventive healthcare concepts and this book provides an insight into current research in health informatics and eHealth addressing many issues central to the future of health and care.
