The African Democracy Muange aa Munguti,2015-05-21 While Africa accepted to receive democracy African leaders closed their eyes against the weaknesses of the system The weakness of the African democracy was the strength of the leaders and those who were prepared to exploit the continent These prepared the big population to toil for the benefit of a few African democracy has eaten away the African culture morals lifestyle and languages African democracy ate the African form of governance justice unity peace medicine man music and dance and labeled them primitive Among the continents on earth only the African ancestry and languages have been lost and disposed In African democracies the promise of prosperity is pegged on foreign languages It is only in African democracies where every African child must put more than twenty five years to learn a foreign language to have a future Only in Africa where 75 percent of the population is insecure in all areas of life and live below the poverty line It is only in African democracies where among a billion people none can make a spoon or a simple toothpick Only African democracies depend on imports foreign investors or naturalized citizens from Asia Europe or America and not the African citizens in industrial development The world should stand up and save Africa to educate her own children in her languages Africa has the right to choose from reality away from mockery

Africa is the only continent that thrives to do away with her languages in pursuit for foreign languages Africa has the only culture that is demonstrated as archaic and antihuman Everything that is African is below par compared to that of the rest of the world Why Africa is unique the Africans are a distinct people and the continent which is the most wealthy with minerals is surprisingly with the poorest people on earth There is a technology gap in Africa The African democracy is the worst form of governance ever founded by humanity *Athenaeum and Literary Chronicle* ,1852 Inside the World's Major East Asian Collections Patrick Lo,Dickson KW Chiu,Allan Cho,2017-05-03 Inside the World s Major East Asian Collections examines the rise of the LAM an acronym that stands for libraries archives and museums In doing so this book profiles leading experts librarians archivists and museum curators who specialise in East Asian collections from across the world In examining the dynamically shifting role of the cultural institution in the context of managing information and collections this book provides important themes offered by these cultural experts in understanding the necessary professional skills knowledge and personalities that are required for working in such environments of varying size scope and composition in LAMs As galleries LAMs manage preservation and access of history and culture and their missions and goals as cultural institutions continue to converge As collecting institutions LAMs share the common mandate to preserve and make accessible primary resources valuable for researchers and professionals as well as the public LAMs are mostly publicly funded publicly accountable institutions collecting cultural heritage materials Another aim of this book is to enhance the visibility and recognise the efforts of the LAM professionals as cultural institution leaders since much of their great contributions in the respective fields to preserving our cultural and documentary heritages have gone unnoticed outside their parent institutions Examines the roles and goals of cultural institutions Brings collections to life through interviews with LAM experts Presents LAMs with a focus on East Asia Serves as a platform for LAM professionals to share and exchange experiences and insights **“The”** *Athenaeum* ,1851 *Rays of the World* Peter Last,Gavin Naylor,Bernard Séret,William White,Marcelo de Carvalho,Matthias Stehmann,2016-12 Rays are among the largest fishes and evolved from shark like ancestors nearly 200 million years ago They share with sharks many life history traits all species are carnivores or scavengers all reproduce by internal fertilisation and all have similar morphological and anatomical characteristics such as skeletons built of cartilage Rays of the World is the first complete pictorial atlas of the world s ray fauna and includes information on many species only recently discovered by scientists while undertaking research for the book It includes all 26 families and 633 valid named species of rays but additional undescribed species exist for many groups Rays of the World features a unique collection of paintings of all living species by Australian natural history artist Lindsay Marshall compiled as part of a multinational research initiative the Chondrichthyan Tree of Life Project Images sourced from around the planet were used by the artist to illustrate the fauna This comprehensive overview of the world s ray fauna summarises information such as general identifying features and distributional information about these iconic but surprisingly poorly known fishes It will enable
