Poincare-Einstein Holography for Forms via Conformal Geometry in the Bulk A. Rod Gover, Emanuele Latini, Andrew Waldron, 2015-04-09 The authors study higher form Proca equations on Einstein manifolds with boundary data along conformal infinity They solve these Laplace type boundary problems formally and to all orders by constructing an operator which projects arbitrary forms to solutions They also develop a product formula for solving these asymptotic problems in general The central tools of their approach are i the conformal geometry of differential forms and the associated exterior tractor calculus and ii a generalised notion of scale which encodes the connection between the underlying geometry and its boundary The latter also controls the breaking of conformal invariance in a very strict way by coupling conformally invariant equations to the scale tractor associated with the generalised scale **Engineering; an Illustrated Weekly Journal**, 1915 **An $SO(3)$ -Monopole Cobordism Formula Relating Donaldson and Seiberg-Witten Invariants** Paul Feehan, Thomas G. Leen, 2019-01-08 The authors prove an analogue of the Kotschick Morgan Conjecture in the context of monopoles obtaining a formula relating the Donaldson and Seiberg Witten invariants of smooth four manifolds using the monopole cobordism The main technical difficulty in the monopole program relating the Seiberg Witten and Donaldson invariants has been to compute intersection pairings on links of strata of reducible monopoles namely the moduli spaces of Seiberg Witten monopoles lying in lower level strata of the Uhlenbeck compactification of the moduli space of monopoles In this monograph the authors prove modulo a gluing theorem which is an extension of their earlier work that these intersection pairings can be expressed in terms of topological data and Seiberg Witten invariants of the four manifold Their proofs that the monopole cobordism yields both the Superconformal Simple Type Conjecture of Moore Mari o and Peradze and Witten s Conjecture in full generality for all closed oriented smooth four manifolds with and odd appear in earlier works **Wire and Wire Products**, 1971
