New Developments in

Online Marketing Stephen Tagg, Alan Stevenson, Tiziano Vescovi, 2013-09-13 There can be little doubt about the profound impact that the Internet has had on all aspects of business over the past decade. Indeed, it is now widely accepted that we have entered a new and even more revolutionary phase in the development of the Net as a global marketing and communications platform, a phase characterised by information pull rather than push, user-generated content, openness, sharing, collaboration, interaction, communities, and social networking. New generation Web-based communities and hosted applications are beginning to have a major impact on customer behaviour across a diverse range of industries. These new applications represent a fundamental change in the way people use the Internet, their online expectations and experiences. From a marketing perspective, the most distinctive feature is not the technology involved but rather the growth of a new global culture, a Net generation culture based on decentralised authority rather than hierarchy and control, online socialising and collaboration, user-generated and distributed content, open communications, peer-to-peer sharing, and global participation. Success in this new online environment characterised by people and network empowerment requires new mindsets and innovative approaches to marketing customer and network relationships. This book makes a valuable contribution to the field by examining recent and future developments in online marketing, including the revolutionary impact of new media. Chapters cover a wide range of topics, including information exchange on bulletin board systems and in online consumer portals. Web 2.0 and New Wave. Global online tribal marketing, co-creation, industry impact, privacy issues, online advertising effectiveness, and practitioner prognostics for the future of online marketing. This book was originally published as a special issue of the Journal of Marketing Management.

Cybersecurity of Digital Service Chains Joanna Kołodziej, Matteo Repetto, Armend Duzha, 2022-04-06 This open access book presents the main scientific results from the H2020 GUARD project. The GUARD project aims at filling the current technological gap between software management paradigms and cybersecurity models, the latter still lacking orchestration and agility to effectively address the dynamicity of the former. This book provides a comprehensive review of the main concepts, architectures, algorithms, and non-technical aspects developed during three years of investigation. The description of the Smart Mobility use case developed at the end of the project gives a practical example of how the GUARD platform and related technologies can be deployed in practical scenarios. We expect the book to be interesting for the broad group of researchers, engineers, and professionals daily experiencing the inadequacy of outdated cybersecurity models for modern computing environments and cyber-physical systems.

Engineering Your Future David Dowling, Roger Hadgraft, Anna Carew, Tim McCarthy, Doug Hargreaves, Caroline Baillie, Sally Male, 2020-01-21 Dowling's Engineering Your Future: An Australasian Guide, Fourth Edition, is used for first-year core subjects across all Engineering disciplines.
