

Tricorder

Warp drive

universal translator: A computer program available in the Voyager main computer. This program can analyze almost any alien language form and translate it into English and vice versa. The universal translator does not work with all language forms, and it has been known to be somewhat unreliable in cases where there has been insufficient time for the computer to analyze the alien language form.

Warp factor: The unit used to measure the speed of faster-than-light travel. Warp factor one is the speed of light. Normal cruising speed for Voyager is Warp 6. Maximum sustainable speed is Warp 9.2. No ship can achieve a speed of Warp 10, the theoretical maximum. Even at the incredible speeds afforded by warp drive, Federation space is still some 75 years away for Voyager. Returning home by normal warp travel is not an option.

warp drive: The main propulsion system of Voyager and most starships. This system enables our ship to travel faster than light, necessary because of the incredibly vast distances between stars. The Voyager warp drive is powered by a matter/antimatter reactor, controlled by dilithium crystals.

Star Trek Manual

CL Gary

Star Trek Manual:

Yeah, reviewing a book **Star Trek Manual** could add your near friends listings. This is just one of the solutions for you to be successful. As understood, triumph does not suggest that you have wonderful points.

Comprehending as skillfully as deal even more than new will meet the expense of each success. neighboring to, the notice as competently as acuteness of this Star Trek Manual can be taken as competently as picked to act.
