comment on social and political issues of the 1960s from the Vietnam War and race relations to the war on terror and women's rights. Later Star Trek series and films also grapple with the issues of their own decades: HIV, ecological threats, the collapse of the Soviet Union, and terrorism. How did Uhura spur real-life gender and racial change in the 1960s? Is Kirk inextricably linked with the mythical Old West? What history do the Klingons share with the Soviet Union? Can Nazi Germany shed light on the history and culture of the Cardassians? Star Trek and History explains how the holodeck is as much a source for entertainment as it is a historical teaching tool: how much of the technology we enjoy today had its conceptual roots in Star Trek, and how, by looking at Norse mythology, we can find our very own Q. Features an exclusive interview with Nichelle Nichols, the actress behind the original Lt Uhura, conducted at the National Air and Space Museum. Explains the historical inspiration behind many of the show's alien races and storylines. Covers topics ranging from how stellar cartography dates back to Ancient Rome, Greece, and Babylonia to how our Great Books of Western literature continue to be an important influence to Star Trek's characters of the future. Includes a timeline comparing the stardates of Star Trek's timeline to our own real-world history. Filled with fascinating historical comparisons, Star Trek and History is an essential companion for every Star Trek fan. Time on TV Lorna Jowett, Kevin Robinson, David Simmons, 2016-06-22 From early examples such as Star Trek and Sapphire and Steel to more contemporary shows including Life on Mars and The Vampire Diaries, time has frequently been used as a device to allow programme makers to experiment stylistically and challenge established ways of thinking. Time on TV provides a range of exciting, accessible yet intellectually rigorous essays that consider the many and varied ways in which telefantasy shows have explored this subject, providing the reader with a greater understanding of the importance of time to the success of genre on the small screen. Hallmark Keepsake Ornaments, The Inside Stories from the Artists Who Create Them John Peterson, 2007 Environmental Criticism for the Twenty-First Century Stephanie LeMenager, Teresa Shewry, Ken Hiltner, 2011-05-09 Environmental Criticism for the Twenty-First Century showcases the recent explosive expansion of environmental criticism, which is actively transforming three areas of broad interest in contemporary literary and cultural studies: history, scale, and science. With contributors engaging texts from the medieval period through the twenty-first century, the collection brings into focus recent ecocritical concern for the long durations through which environmental imaginations have been shaped. Contributors also address problems of scale, including environmental institutions and imaginations that complicate conventional rubrics such as the national, local, and global. Finally, this collection brings together a set of scholars who are interested in drawing on both the sciences and the humanities in order to find compelling stories for engaging ecological processes such as global climate change, peak oil production, nuclear proliferation, and food scarcity. Environmental Criticism for the Twenty-First Century offers powerful proof that cultural criticism is itself ecologically resilient, evolving to meet the imaginative challenges of twenty-first-century environmental crises. *Popular Culture as Art and Knowledge* George A. Gonzalez, 2019-01-15 This volume settles the debate between

analytic and continental philosophy It turns to art more specifically popular culture to demonstrate the validity of continental philosophy Drawing on the philosophy of Georg Hegel perhaps the most important of continental philosophers James Kreines holds that reason in the world metaphysically exists Reasons of the world are reasons of the Hegelian Absolute Thus similar to the fact that gravity is curves in the space time continuum along which matter moves reasons are the grooves in the Absolute along which human decision making occurs Art allows us to conceptualize understand speculate about the grooves reasons of the Absolute Two key points can be drawn from Kreines s position first normative values are embedded in reality Thus in complete contradistinction to analytic philosophy there is no bifurcation between the empirical and the normative to exist is to have normative value Secondly the role of social science is to cogitate explore identify the reasons of the world that shape social political norms Such an approach would decisively move the social sciences away from an emphasis on statistically significant patterns of human behavior e g voting studies and toward an approach that seeks to analyze the reasons of the world that motivate shape social and political decisions Art particularly popular culture becomes an important source in identifying the way that people reason about the world and how they perceive political elites reasoning in the world To adjudicate between continental and analytic philosophy this book on relies on the broadcast iterations of Star Trek as well as Nazi cinema With regard to contemporary American politics in addition to Star Trek it draws on the television series Game of Thrones Veep House of Cards and The Man in the High Castle Popular culture is germane to philosophy and contemporary politics because television movie creators frequently try to attract viewers by conveying authentic philosophical and political motifs Conversely viewers seek out authentic movies and television shows This is in contrast to opinion surveys for instance as the formation of the data begins with the surveyor seeking to directly solicit an opinion however impromptu or shallow
