Kaufmann, Neil F. Comins, 2008-12-26 *Discovering the Universe From the Stars to the Planets* engages students with an inquiry based exploration of the universe and the scientific process. Developed with a big picture approach, the text first explains how the stars, the galaxies, and the entire universe formed and then discusses planets and other components of our solar system. Students follow this natural conceptual progression within a proven learning method designed to address misconceptions and build a deep understanding of science and the world around us. **In Quest of the Solar System** Theo Koupelis, 2010-01-26 *In Quest of the Stars and Galaxies* Theo Koupelis, 2010-01-26 Available with WebAssign. Author Theo Koupelis has set the mark for a student friendly accessible introductory astronomy text with *In Quest of the Universe*. He has now developed a new text to accommodate those courses that focus mainly on stars and galaxies. Ideal for the one term course, *In Quest of the Stars and Galaxies* opens with material essential to the introductory course: gravity, light, telescopes, the sun, and then moves on to focus on key material related to stars and galaxies. Incorporating the rich pedagogy and vibrant art program that have made his earlier books a success, Koupelis' *In Quest of the Stars and Galaxies* is the clear choice for students' first exploration of the cosmos. **Conducting Astronomy Education Research** Janelle M. Bailey, Timothy F. Slater, Stephanie J. Slater, 2011-01-28 Tim Slater and Roger Freedman have worked to improve astronomy and overall science education for many years. Now they've partnered to create a new textbook, a re-envisioning of the course focused on conceptual understanding and inquiry based learning. *Investigating Astronomy: A Conceptual Approach to the Universe* is a brief 15 chapter text that employs a variety of activities and experiences to encourage students to think like a scientist.
