State And Agents In China Disciplining Government Officials:

State and Agents in China Yongshun Cai, 2014-12-10 Chinese government officials have played a crucial role in China's economic development but they are also responsible for severe problems including environmental pollution violation of citizens rights failure in governance and corruption How does the Chinese Party state respond when a government official commits a duty related malfeasance or criminal activity And how does it balance the potential political costs of disciplining its own agents versus the loss of legitimacy in tolerating their misdeeds State and Agents in China explores how the party state addresses this dilemma uncovering the rationale behind the selective disciplining of government officials and its implications for governance in China By examining the discipline of state agents Cai shows how selective punishment becomes the means of balancing the need for and difficulties of disciplining agents and explains why some erring agents are tolerated while others are punished Cai finds that the effectiveness of punishing erring officials in China does not depend so much on the Party state's capacity to detect and punish each erring official but on the threat it creates when the Party state decides to mete out punishment Importantly the book also shows how relaxed discipline allows reform minded officials to use rule violating reform measures to address local problems and how such reform measures have significant implications for the regime's resilience

Social Disciplining and Civilising Processes in China Thomas Heberer, 2023-08-11 This book argues that a major part of the Chinese government's road map formulated in 2017 to modernise China comprehensively by 2049 is the process of social disciplining It contends that the Chinese state sees that modernisation and modernity encompass not only economic and political administrative change but are also related to the organisation of society in general and the disciplining of this society and its individuals to create people with modernised minds and

behaviour and that moreover the Chinese state is aspiring to a modernity with Chinese characteristics The question of modernising by disciplining was extensively dealt with in the twentieth century by leading Western social scientists including Max Weber Norbert Elias and Michel Foucault who argued that disciplining extending from external coercion towards the internalisation of restraints is indispensable for achieving social order and thereby for civilisation but defined from a European perspective in relation to developments in Europe This book therefore not only discusses the Chinese experience of social disciplining but also by looking at a non Western society identifies universal tendencies of societal change and social disciplining and separates them from particular occurrences China's Contained Resource Curse Jing Vivian

Zhan,2022-03-31 A novel empirical study of the resource curse and the state response in contemporary China **More than just a 'Home'** Rosalina Pisco Costa,Sampson Lee Blair,2024-05-29 Considering the ways in which a family socially

constructs a home this is a much needed investigation into how the house its architecture spatial arrangements and internal and external divisions shape and reshape family relationships in the face of constant challenges and change When People Want Punishment Lily L. Tsai,2021-08-12 Against the backdrop of rising populism around the world and democratic

backsliding in countries with robust multiparty elections this book asks why ordinary people favor authoritarian leaders Much of the existing scholarship on illiberal regimes and authoritarian durability focuses on institutional explanations but Tsai argues that to better understand these issues we need to examine public opinion and citizens concerns about retributive justice Government authorities uphold retributive justice and are viewed by citizens as fair and committed to public good when they affirm society s basic values by punishing wrongdoers who act against these values Tsai argues that the production of retributive justice and moral order is a central function of the state and an important component of state building Drawing on rich empirical evidence from in depth fieldwork original surveys and innovative experiments the book provides a new framework for understanding authoritarian resilience and democratic fragility **China's Political System**

Sebastian Heilmann,2016-12-08 The Chinese government is one of the most important actors in international affairs today To thoroughly understand how the People s Republic of China has grown in power requires a careful analysis of its political system To what extent can China s economic achievements be attributed to the country s political system and its policies What are the effects of economic modernization and global economic integration on the Chinese polity Is the Chinese political system capable of adapting to changing economic technological social and international conditions Exploring these central questions this definitive book provides readers with a comprehensive assessment of the preconditions prospects and risks associated with China s political development **End of an Era** Carl Minzner,2018-02-01 China s reform era is ending

Core factors that characterized it political stability ideological openness and rapid economic growth are unraveling Since the 1990s Beijing s leaders have firmly rejected any fundamental reform of their authoritarian one party political system and on the surface their efforts have been a success But as Carl Minzner shows a closer look at China s reform era reveals a

different truth Over the past three decades a frozen political system has fueled both the rise of entrenched interests within the Communist Party itself and the systematic underdevelopment of institutions of governance among state and society at large Economic cleavages have widened Social unrest has worsened Ideological polarization has deepened Now to address these looming problems China's leaders are progressively cannibalizing institutional norms and practices that have formed the bedrock of the regime's stability in the reform era End of an Era explains how China arrived at this dangerous turning point and outlines the potential outcomes that could result

The Accountability Paradox in the Chinese Bureaucracy

Wenyan Tu, 2026-07-18 This book explores the accountability paradox in the Chinese bureaucracy The purpose of accountability is to foster compliance and responsiveness among bureaucrats but instead it causes bureaucrats coping tactics blame avoiding strategies and defensive behavior which constitutes a paradox or pathology of accountability The accountability paradox is well documented in Western countries but scarce attention has been paid to the accountability system in the Chinese context It appears that the accountability paradox is also present in the Chinese context since a series of major transformations were initiated to overhaul the accountability system in China following the 18th National Party Congress in 2012 but exhibits characteristics that are unique to China In a tightly argued book driven by comprehensive interviews and survey investigations Dr Tu sheds light on a subject of interest to sinologists political scientists and journalists

The New Motivation and Dilemma of China's Soft Power in the Age of Noopolitik Zheng Li, 2022-05-17 Good governance and anti corruption efforts were expected to enhance soft power overseas The party state successfully governed China for decades relying on its controversial governance approaches The country has visibly demonstrated economic and social development However China's growing influence has failed to be recognised as soft power being viewed rather as sharp power most times The monograph investigates whether China is mindful of exporting its political ideas and whether it considers its governance model to be the pillar of its soft power portfolio Through framing analysis of media coverage and in depth interviews with Australian public diplomacy experts the monograph presents how Australia a western country with close economic ties with China interprets China's intended narrative regarding its governance model and development Examining the congruity between China's projection and Australia's mediation sheds a new light on the relationship between domestic governance soft power and sharp power By sketching out Beijing's ambitions and attempts the monograph draws implications about China's public diplomacy and the future global order

students and scholars particularly those of Asian studies politics and sociology The Oxford Handbook of Administrative Justice Marc Hertogh, Richard Kirkham, Robert Thomas, Joe Tomlinson, 2022 The core animating feature of administrative justice scholarship is the desire to understand how justice is achieved through the delivery of public services and the actions inactions and decision making of administrative bodies The study of administrative justice also encompasses the redress systems by which people can challenge administrative bodies to seek the correction of injustices For a long time now scholars have been interested in administrative justice but without necessarily framing their work as such Rather than existing under the rubric of administrative justice much of the research undertaken has existed within sub categories of disciplines such as law sociology public policy politics and public administration Consequently although aspects of the topic have attracted rich contributions across such disciplines administrative justice has rarely been studied or taught in a manner that integrates these areas of research more systematically This Handbook signals a major change of approach Drawing together a group of world leading scholars of administrative justice from a range of disciplines The Oxford Handbook of Administrative Justice shows how administrative justice is a vibrant complex and contested field that is best understood as an area of inquiry in its own right rather than through traditional disciplinary silos **The Occupy Movement in Hong Kong** Yongshun Cai, 2016-08-12 The Occupy movement in Hong Kong was sustained for about 80 days because of government tolerance the presence of determined participants and a weak leadership The government tolerated the occupation because its initial use of force in particular teargas was counterproductive and provoked large scale participation Unlike other social movements such as the 1989 Tiananmen movement the Occupy movement reached its peak of participation at the very beginning making it difficult to sustain the momentum The presence of determined participants who chose to stay until the government responded was crucial to the sustaining of the movement These self selected participants were caught in a dilemma between fruitless occupation and reluctance to retreat without a success The movement lasted also because the weak leadership was unable to force the government to concede or devise approaches for making a graceful exit Consequently site clearance became the common choice of both the government and the protestors This book develops a new framework to explain the sustaining of decentralized protest in the absence of strong movement organizations and leadership Sustained protests are worth research because they not only reveal the broad social context in which the protests arise and persist but also point out the dynamics of the escalation or the decline of the protests In addition sustained protest may not only lead to more dramatic action but they also result in the diffusion of protests or lead to significant policy changes *Gao Village Revisited* Mobo C F Gao, 2019-01-30 The personal stories of the Gao villagers demonstrate and are related to changes in China This is a close study of Gao Village twenty years after the author an anthropologist and native of Gao village wrote his original ethnography Gao Village It combines ethnographic analysis personal vignettes and a number of fascinating stories which presents a convincing yet complex picture of how Gao villagers interact with the outside world With his

sympathetic and insider's approach the author argues that rural Chinese display great entrepreneurship and inner strength of selfimprovement they are active contributors to China's economic boom **UNESCO Global Geoparks** Yves

Girault,2020-01-02 Recently UNESCO has gradually started to recognize world geoparks territorial spaces with a geological heritage of international importance This classification presents real challenges Development strategies must align with the recommendations advocated by various non governmental organizations It is also necessary to involve the local actors both in the preparation of application forms and in the implementation of a management plan that is suitable for sustainable global development Managing the tensions and asymmetries that exist between the different groups of actors politicians managers scientists representatives of local populations constitutes another major issue It is in this context and through various case studies that this book questions the aims of the UNESCO global geoparks in terms of heritage inventory and conservation the participation of local populations the local development of a territory and its enhancement through heritage interpretation
